Supporting the transplant community with analyses to improve patient outcomes.

The Scientific Registry of Transplant Recipients is a national database of statistics related to solid organ transplantation - kidney, liver, pancreas, intestine, heart, and lung. The registry covers the full range of transplant activity, from organ donation and waiting list candidates to transplant recipients and survival statistics. Its purpose: to support the development of sound policy, to encourage research on issues of importance to the transplant community, and to facilitate responsible analysis of transplant programs and OPOs. Recent News

Transplant program and OPO specific reports:

The transplant program and OPO specific reports released publicly July 12, 2011, are now available.

Dear Transplant Community:

On September 14, 2010, the [Health Resources and Services Administration \(HRSA\)](#) awarded the Scientific Registry of Transplant Recipients (SRTR) contract to the [Minneapolis Medical Research Foundation \(MMRF\)](#). The contract is now administered by the [Chronic Disease Research Group \(CDRG\)](#), a division of MMRF. Our team is honored to have been selected to serve the transplant community and will strive to continue the excellent work carried out from October 2000 to December 2010 by the Arbor Research Collaborative for Health. In the fall of 2010, we worked with Arbor Research staff to effect a smooth transition in contractors. Our goal is to provide minimal disruption to all stakeholders in the SRTR operation. OPTN/SRTR Annual Report Published October 14, 2010

The 2009 OPTN/SRTR Annual Report, a publication of the U.S. Department of Health and Human Services, has been released online. The report includes comprehensive data on solid organ transplantation during the last 10 years. It also includes 10 chapters, featuring three special focus articles on geographic variation in ESRD, DonorNet, and access and outcomes among minority patients. The report also offers numerous resources for transplant professionals, patients and their families, and researchers. [View the 2009 Annual Report.](#)

The SRTR is administered by the Chronic Disease Research Group of the Minneapolis Medical Research Foundation, with oversight and funding from the Health Resources and Services Administration.
