I. Waiver History

Background

Florida's Medicaid Reform is a comprehensive demonstration that seeks to improve the value of the Medicaid delivery system. Florida expects to gain valuable information about the effects of allowing market-based approaches to assist the state in its service to Medicaid recipients. Key components of the demonstration include:

- Comprehensive choice counseling,
- Customized benefit packages,
- Enhanced benefits for participating in healthy behaviors,
- Risk-adjusted premiums based on enrollee health status, and
- Low Income Pool.

The Medicaid Reform program is operated under an 1115 Research and Demonstration Waiver initially approved by the Centers for Medicare and Medicaid Services (Federal CMS) on October 19, 2005. State authority to operate the program is located in Section (s.) 409.91211, Florida Statutes (F.S.), which provides authorization for a statewide pilot program with implementation that began in Broward and Duval Counties on July 1, 2006. The program expanded to Baker, Clay and Nassau Counties on July 1, 2007.

On June 30, 2010, the Agency for Health Care Administration (Agency) submitted a three-year waiver extension request to maintain and continue operations of the demonstration waiver for the period July 1, 2011 through June 30, 2014. Federal CMS granted temporary extensions of the waiver from July 1, 2011 until December 15, 2011, when final approval of the waiver extension request was granted, for the period December 16, 2011 through June 30, 2014.

On August 1, 2011, the Agency submitted an amendment request to Federal CMS to implement the Managed Medical Assistance (MMA) program as specified in Part IV of Chapter 409, F.S. The amendment packet, a description of the MMA program and additional information including correspondence with Federal CMS can be viewed on the Agency's website at the following link: http://ahca.myflorida.com/Medicaid/statewide_mc/index.shtml#MMA.

On February 20, 2013, the Agency received a letter from Federal CMS stating an agreement in principle was reached regarding Federal CMS granting the wavier. The Agency continues to work with Federal CMS to finalize the Special Terms and Conditions (STCs) of the waiver.

The reporting requirements for the 1115 Medicaid Reform Waiver are specified in Florida law and STCs #19 and #20 of the waiver. STC #19 requires that the state submit a quarterly progress report summarizing the events occurring during the quarter or anticipated to occur in the near future that affect health care delivery, including, but not limited to, approval and contracting with new plans, specifying coverage area, populations served, benefits, enrollment, grievances and other operational issues.

This report is the third quarterly report for Demonstration Year Seven covering the period of January 1, 2013 – March 31, 2013. For detailed information about the activities that occurred during previous quarters of the demonstration, refer to the quarterly and annual reports, which can be accessed at: http://ahca.myflorida.com/Medicaid/medicaid_reform/index.shtml.

II. Status of Medicaid Reform

A. Health Care Delivery System

1. Health Plan Contracting Process

Overview

All health plans, including contractors wanting to participate as demonstration health plans, are required to complete a Medicaid health plan application. The Agency uses an open health plan application process with submission guidelines to ensure applicants understand the contract requirements. The application process consists of four areas: (I) organizational and administrative structure; (II) policies and procedures; (III) on-site review; and (IV) contract execution, establishing a provider file in the Florida Medicaid Management Information System (FLMMIS), completing systems testing to ensure the health plan applicant is capable of submitting and retrieving HIPAA-compliant files and submitting accurate provider network files, and ensuring the health plan receives its first membership.

Current Activities

Health Plan Applications and Expansion Requests

Since the implementation of the demonstration, the Agency has received 29 health plan applications [20 health maintenance organizations (HMOs) and nine fee-for-service (FFS) provider service networks (PSNs)], of which 26 applicants sought and received approval to provide services to both the Temporary Assistance for Needy Families (TANF) and the Supplemental Security Income (SSI) populations.

During this quarter, and at the request of the applicant, CareAccess withdrew its application to be a PSN in Broward County.

The Agency received no new applications this quarter. The Magellan Complete Care application to be an HMO in Broward County remains under Agency review and is anticipated to be approved during next quarter.

The Agency continues to review the request from Sunshine HMO to expand into Baker and Nassau Counties.

Remainder of page intentionally left blank.

Table 1 provides a comprehensive list since the implementation of the demonstration of all health plan applicants, the date each application was received, the date each application was approved, and the initial counties of operation requested by each applicant.

* During the Fall of 2008, the plan amended its contract to withdraw from this county. The United withdrawal was effective November 1, 2008. The Vista/Buena Vista withdrawal was effective December 1, 2008.

** During the Fall of 2008, the plan terminated its contract for this county effective February 1, 2009.

*** During the Spring of 2009, the plan notified the Agency to withdraw from these counties. The withdrawals for Healthease and Staywell were effective July 1, 2010.

**** During the Summer of 2009, the plan notified the Agency of its intent to withdraw from this county. The withdrawals for Amerigroup and Preferred were effective December 1, 2009.

***** Sunshine began providing services in these counties effective September 1, 2009.

****** First Coast Advantage expanded into these counties effective December 1, 2010.

\+ Sunshine withdrew from Nassau and Baker Counties effective December 31, 2010.

Health Plan Capacity

Health plan capacity is monitored on an ongoing basis. Health plans must supply an up-to-date provider network information file each month. The Agency uses the file to monitor the health plans' compliance with required provider network composition and primary care physician (PCP)-to-member ratios. The choice counseling/enrollment broker contractor loads this information into its system for use as a choice selection tool and to enable PCP selection at the time of voluntary plan enrollment. Additionally, the Agency monitors overall capacity to ensure recipients have a choice of at least two health plans in each demonstration county.

On January 1, 2013, Healthease/Staywell (HMO) began providing services in all five demonstration counties. On March 1, 2013, Simply Healthcare d/b/a Clear Health Alliance (HMO) began providing services as a specialty plan for individuals living with HIV or AIDS in Broward County.

During this quarter, the Agency received a request from Sunshine State Health Plan (HMO) to increase its maximum enrollment level in Duval County. This request is under Agency review, as well as the previously received request from United Healthcare (HMO) to increase its maximum enrollment levels in Clay and Duval Counties and the previously received request from Children's Medical Services (PSN) to increase its maximum enrollment level in Broward County.

Contract Amendments and Model Contracts

This quarter, some plans chose to provide home health visits and primary care physician visits beyond limitations contained in Florida's State Plan. During this quarter, contract amendments were executed for those plans to allow them to list the services as expanded benefits effective March 1, 2013.

Contract Conversions/Terminations

On March 21, 2013, Universal Health Care, Inc. (HMO) was ordered into receivership by the Second Judicial Circuit Court in Leon County, Florida. Pursuant to the Court Order, Universal moved into receivership for purposes of liquidation on April 1, 2013 resulting in the Agency's termination of the Universal Health Care, Inc. (HMO) contract. The Agency actively worked to seamlessly transition impacted recipients into new health plans.

FFS PSN Conversion Process

FFS PSNs are required to convert to capitation by the beginning of the final year of operation under the waiver extension, unless the FFS PSN opts to convert to capitation earlier as specified in s. 409.91211(3)(e), F.S. The Agency released an updated FFS PSN conversion application in April 2012 and continues to provide technical assistance to the FFS PSNs regarding conversion. Most FFS PSNs have submitted conversion applications. Table 3 provides the timeline to comply with the FFS PSN conversion-to-capitation requirement.

Table 3
PSN Conversion to Capitation Timeline

Deadline for current FFS PSNs to submit conversion applications to the Agency.	09/01/2013
Successful conversion of applicants and execution of capitated contracts for service begin date of 09/01/2014.	06/30/2014

2. Benefit Package

Overview

Customized benefit packages are one of the fundamental elements of the demonstration. Medicaid recipients are offered choices in health plan benefit packages customized to provide services that better suit health plan enrollees' needs. The demonstration authorizes the Agency to allow capitated plans to create a customized benefit package by varying certain services for non-pregnant adults, varying cost-sharing and providing additional services. PSNs that chose a FFS reimbursement payment methodology cannot develop a customized benefit package, but can eliminate or reduce the co-payments and offer additional services. For more information about the design of the customized benefit packages, please refer to the most recent annual report posted on the Agency's website at the following link: http://ahca.myflorida.com/Medicaid/medicaid_reform/annual.shtml.

Current Activities

Customized Benefit Packages

The customized benefit packages became operational on January 1, 2013 and will remain valid until December 31, 2013, effectively overlapping Year Seven and Year Eight of the demonstration. These benefit packages include 25 customized benefit packages for the HMOs and ten benefit packages for the FFS PSNs.

Table 4 located on the following page lists the number of co-payments for each service type by each Demonstration Year. Benefit packages approved for Year Three of the demonstration were extended until December of 2009 in order to provide adequate notification to the recipients of any changes in their current health plan's benefit package as well as to allow time for the printing and distribution of the revised choice materials for Demonstration Year Four. As such, in Tables 4 and 5, Demonstration Year Three has been divided into three columns: July 1, 2008 through December 31, 2008; January 1, 2009 through November 30, 2009; and December 2009. These different columns reflect the departure of health plans that ceased operations during Demonstration Year Three. In addition, Table 4 has been updated to reflect the customized benefit packages effective January 1, 2013 – December 31, 2013.

During this quarter, Simply Health Care d/b/a Clear Health Alliance began operations in Broward County, and Healthease/Staywell (HMO) began operations in all five demonstration counties. Universal Health Care (HMO) ceased operations in Broward and Duval Counties on the last day of this quarter.

Table 6 shows the number of benefit packages for Demonstration Years Four through Seven not requiring co-payments by population and area. Table 6 shows that for each area and target population, there is at least one benefit package to choose from that does not require co-payments.

Table 6
Number of Benefit Packages Requiring No Co-payments by Target Population and Area

Target Population	List of Counties in Each Demonstration Area	Number of Benefit Packages Not Requiring Co-payments						
		Year Four		Year Five		Year Six	Year Seven	
		Jan	May	July-Dec	Jan	July-June	July-Dec 2012	Jan-March 2013
SSI (Aged and Disabled)	Duval, Baker, Clay and Nassau	3	3	3	1	1	1	1
SSI (Aged and Disabled)	Broward	6	5	5	6	6	7	8
TANF (Children and Families)	Duval, Baker, Clay and Nassau	1	1	1	1	1	1	1
TANF (Children and Families)	Broward	6	5	5	6	5	6	6

Expanded Services

In Year Seven of the demonstration, all of the capitated health plans continue to offer expanded or additional benefits that were not previously covered by the state under the Medicaid State Plan in order to meet the needs of new enrollees. In the health plan contract, these are referred to as expanded services. The following is a list of the expanded services currently offered by the capitated health plans of which the over-the-counter drug benefits and adult preventive benefits are the most frequently offered:

- Over-the-counter drug benefit – $25 per household per month
- Adult preventive dental
- Circumcisions for male newborns
- Additional adult vision
- Nutritional Counseling.

Plan Evaluation Tool (PET)

Since the implementation of the demonstration, no changes have been made to the sufficiency thresholds that were established for the first contract period of September 1, 2006 to August 31, 2007. After reviewing the available data – including data related to the plans' pharmacy benefit limits – the Agency decided to limit the pharmacy benefit in Demonstration Year Three to a monthly script limit only. Prior to Demonstration Year Three, plans had the option of having a monthly script limit or a dollar limit on the pharmacy benefit. This change was made to standardize the mechanism used to limit the pharmacy benefit. The Agency will continue to require the plans to maintain the sufficiency threshold level of pharmacy benefit for SSI and TANF at 98.5%. In addition, the Agency will ensure each plan's customized benefit package meets or exceeds, and maintains, a minimum threshold of 98.5% for benefits identified as sufficiency tested benefits as required by STC #39.

The PET submission procedure for Demonstration Year Seven was similar to that of the six previous years. The new PET was released by the Agency during the second quarter of Demonstration Year Seven. The health plans' Year Seven benefit packages were approved during the previous quarter and became effective January 1, 2013.

3. Health Plan Reported Complaints, Grievances and Appeal Process

Overview

Health plan contracts include a grievance process, appeal process and Medicaid Fair Hearing (MFH) system. In addition, the health plan contracts include timeframes for submission, plan response and resolution of recipient grievances. This is compliant with federal grievance system requirements located in Subpart F of 42 CFR 438.

As defined in the health plan contracts:

- Action means the denial or limited authorization of a requested service, including the type or level of service, pursuant to 42 CFR 438.400(b); the reduction, suspension or termination of a previously authorized service; the denial, in whole or in part, of payment for a service; the failure to provide services in a timely manner, as defined by the state; the failure of the health plan to act within ninety (90) days from the date the health plan receives a grievance, or 45 days from the date the health plan receives an appeal; and for a resident of a rural area with only one (1) managed care entity, the denial of an enrollee's request to exercise his or her rights to obtain services outside the network.
- Appeal means a request for review of an action, pursuant to 42 CFR 438.400(b).
- Grievance means an expression of dissatisfaction about any matter other than an action. Possible subjects for grievances include, but are not limited to, the quality of care, the quality of services provided and aspects of interpersonal relationships such as rudeness of a provider or employee or failure to respect the enrollee's rights.

In accordance with s. 409.91211(3)(q), F.S., the Agency provides for an additional grievance resolution process for enrollees, upon completion of the health plan's internal grievance process, which is referred to as the Beneficiary Assistance Panel (BAP). The BAP will not consider a request that has already been to a MFH. The BAP reviews the requests within the following timeframes:

1. The state panel will review general grievances within 120 days.
2. The state panel will review grievances that the state determines pose an immediate and serious threat to an enrollee's health within 45 days.
3. The state panel will review grievances that the state determines relate to imminent and emergent jeopardy to the life of the enrollee within 24 hours.

Enrollees in a health plan may file a request for a MHF at any time and are not required to exhaust the plan's internal appeal process or file with the BAP.

Current Activities

The Agency recognizes the need to understand the nature of all issues, regardless of the level at which they are resolved. To better understand the issues recipients face and how and where they are being resolved, the Agency is reporting all grievances and appeals at the health plan

level in the quarterly reports. The Agency also uses this information internally as part of the Agency's continuous improvement efforts.

Health Plan Reported Complaints

The health plan contract requires the health plans to report the number of member complaints received by plan by quarter.

Table 7 provides the number of complaints reported by plan type for this quarter. The health plan contract defines complaint as: any oral or written expression of dissatisfaction by an enrollee submitted to the health plan or to a state agency and resolved by close of business the following business day. The subjects for complaints include, but are not limited to, the quality of care, the quality of services provided, aspects of interpersonal relationships such as rudeness of a provider or health plan employee, failure to respect the enrollee's rights, health plan administration, claims practices or provision of services that relate to the quality of care rendered by a provider pursuant to the health plan's contract. A complaint is an informal component of the grievance system.

Table 7
Health Plan Reported Complaints
(January 1, 2013 – March 31, 2013)

Quarter	PSN Complaints	HMO Complaints
January 1, 2013 – March 31, 2013	80	623

PSN plan reported complaints decreased from 206 reported last quarter to 80 in this quarter. HMO plan reported complaints increased from 538 reported last quarter to 623 in this quarter.

Grievances and Appeals

Table 8 provides the number of grievances and appeals by health plan type for this quarter.

Table 8
Grievances and Appeals
(January 1, 2013 – March 31, 2013)

Quarter	PSN Grievances	PSN Appeals	HMO Grievances	HMO Appeals
January 1, 2013 – March 31, 2013	6	29	205	64

PSN grievances decreased from 21 reported last quarter to six in this quarter; the PSN appeals decreased from 55 reported last quarter to 29 in this quarter. HMO grievances decreased from 222 reported last quarter to 205 in this quarter; the HMO appeals decreased from 81 reported last quarter to 64 in this quarter.

Medicaid Fair Hearings

Table 9 located on the following page provides the number of MFHs requested and held during this quarter. Medicaid Fair Hearings are conducted through the Florida Department of Children and Families and, as a result, health plans are not required to report the number of fair hearings requested by enrolled members; however, the Agency monitors the MFH process. There were a total of 14 MFHs requested this quarter: eight for HMOs and six for PSNs. Of the 14 MFH requests relating to demonstration participants, two were related to the

reduction/suspension/termination of benefits/services, four were related to the denial/limitation of a benefit and/or service, one was related to the denial of a medication, and two were related to the inability to change plans. The remaining five requests had not yet progressed to being classified prior to the end of this quarter. In regards to outcomes, three cases were resolved, five were withdrawn, two were dismissed and three were abandoned. In one case, a hearing was requested, but not scheduled prior to the end of the quarter.

Table 9
Medicaid Fair Hearing Requests and Medicaid Fair Hearings Held
(January 1, 2013 – March 31, 2013)

Quarter	Plan Type	Medicaid Fair Hearings Held	Medicaid Fair Hearings Requested
January 1, 2013 – March 31, 2013	**HMO**	6	8
	PSN	2	6
	Total	**8**	**14**

Beneficiary Assistance Program

Table 10 provides the number of grievances submitted to the BAP during this quarter. A total of three grievances were submitted to the BAP; two for HMOs and one for PSNs. The three requests were all related to the denial of a medication and were resolved without a hearing.

Table 10
BAP Requests
(January 1, 2013 – March 31, 2013)

Quarter	HMO	PSN	Total
January 1, 2013 – March 31, 2013	2	1	**3**

4. Agency-Received Complaints/Issues Resolution Process

Overview

Complaints/issues received by the Agency regarding the health plans provide the Agency with feedback on the operation of managed care under the demonstration. Complaints/issues come to the Agency from recipients, advocates, providers and other stakeholders and through a variety of Agency locations. The primary locations where the complaints are received by the Agency are as follows:

- Medicaid Local Area Offices,
- Medicaid Headquarters Bureau of Managed Health Care,
- Medicaid Headquarters Bureau of Health Systems Development, and
- Medicaid Choice Counseling Helpline. Health plan complaints received by the Choice Counseling Helpline are referred to the Florida Medicaid headquarters offices specified above for resolution.

The complaints/issues are processed by Florida Medicaid Local Area Office and/or Headquarters staff depending on the nature and complexity of the complaint/issue. Some complaints/issues are referred to the health plan for resolution and the Agency tracks these to

ensure resolution. Medicaid staff use the Complaints/Issues Reporting and Tracking System (CIRTS), which allows for real-time, secure access through the Agency's web portal. In addition, the Agency tracks the complaints by plan and plan type to review complaint data on individual plans on a monthly basis and reviews complaint trends on a quarterly basis at the management level.

Table 11 provides the number of complaints/issues the Agency received by type of health plan during the quarter. Attachments I (PSN Complaints) and II (HMO Complaints) of this report provide a description of each complaint/issue the Agency received and the action(s) taken by the Agency and/or the health plan to resolve the issue.

Table 11
Agency-Received Complaints/Issues
(January 1, 2013 – March 31, 2013)

Quarter	HMO	PSN	Total
January 1, 2013 – March 31, 2013	22	14	**36**

This quarter, the complaints/issues received from recipients, advocates and other stakeholders primarily related to enrollees needing assistance in accessing providers, obtaining medications and getting services authorized. The Agency worked with the enrollees and health plans to resolve these issues. The complaints/issues received from providers related to claims processing or payment delays/denials. The health plans were informed of the complaints/issues received this quarter and, in most cases, the health plans were instrumental in obtaining the information or service the enrollee or provider needed.

The Agency will continue to monitor the complaints/issues received for contractual compliance, plan performance, and trends that may require policy or operational changes.

5. Medical Loss Ratio

Overview

In accordance with STC #14, the Agency submitted to Federal CMS the draft Medical Loss Ratio (MLR) instructions and templates, the draft reporting schedule and the draft report guide on March 13, 2012. This information is posted on the Agency's website at the following link: http://ahca.myflorida.com/Medicaid/medicaid_reform/pdf/Special_Terms_Conditions_14_03-13-2012.pdf.

Current Activities

On June 25, 2012, the Agency submitted to Federal CMS the revised MLR instructions and templates, reporting schedule and the report guide that incorporated comments from the health plans and Federal CMS. The substantive change made to this policy was to extend the reporting deadline from 45 days to seven months after the end of each quarter or year for which the health plan is reporting. This change was made based on comments received by Federal CMS on June 15, 2012 to allow for the initial claims filing and claims adjudication to conclude so that the incurred but not reported (IBNR) ratio is lower. The revised MLR reporting schedule is outlined in Table 12 located on the following page, and became effective October 1, 2012.

Table 12 Health Plan Medical Loss Ratio Reporting Schedule			
Demonstration Year	**Quarter**	**Due to Agency**	**Due to CMS**
Demonstration Year 7 (07/01/12 – 6/30/13)	**Q1:** 07/01/12 – 09/30/12	04/30/2013	05/15/2013
	Q2: 10/01/12 – 12/31/12	07/31/2013	08/15/2013
	Q3: 01/01/13 – 03/31/13	10/31/2013	11/15/2013
	Q4: 04/01/13 – 06/30/13	01/30/2014	02/14/2014
	DY 7 Annual Report	01/30/2014	02/14/2014
Demonstration Year 8 (07/01/13 – 06/30/14)	**Q1:** 07/01/13 – 09/30/13	04/30/2014	05/15/2014
	Q2: 10/01/13 – 12/31/13	07/31/2014	08/15/2014
	Q3: 01/01/14 – 03/31/14	10/31/2014	11/15/2014
	Q4: 04/01/14 – 06/30/14	01/30/2015	02/14/2015
	DY 8 Annual Report	01/30/2015	02/14/2015

In addition, the draft plan contract amendment language was posted on the Agency's managed care website and provided to the health plans on July 1, 2012. After reviewing comments from Federal CMS and the health plans, the Agency revised the core contract provisions that became effective September 1, 2012 to reflect the following:

> In accordance with the Florida's Section 1115 Demonstration STCs, capitated health plans shall maintain an annual (July 1 through June 30) MLR of eighty-five percent (85%) for operations in the demonstration counties beginning July 1, 2012. The health plan shall submit data to the Agency quarterly to show ongoing compliance. The Federal CMS will determine the corrective action for non-compliance with this requirement.

Note: The capitated plan's MLR data is evaluated annually to determine compliance, and quarterly reports are provided primarily for informational purposes. Seasonality and inherent claims volatility may cause MLR results to fluctuate somewhat from quarter to quarter, especially for smaller plans.

The updated Health Plan Report Guide was posted July 1, 2012 and became effective 90 days later on October 1, 2012. As provided in the updated Report Guide, health plans will be expected to submit quarterly and annual MLR reports using the Agency supplied template and in accordance with the filing instructions in the draft version of Chapter 38. Quarterly MLR reports will be due to the Agency no later than 7 months following the close of the quarter. The first Annual MLR report, for the waiver Demonstration Year Seven (July 1, 2012 – June 30, 2013), is due to the Agency on January 30, 2014. As noted in Table 12, the first quarterly MLR report for Demonstration Year Seven is due to the Agency on April 30, 2013.

The MLR calculation shall utilize uniform financial data collected from all capitated health plans operating in the demonstration areas and shall be computed for each plan on a statewide basis. For the purpose of calculating the MLR, "health care covered services" are defined as services

provided by the health plan to Medicaid recipients in the demonstration area in accordance with the Health Plan Medicaid Contract and as outlined in Section V, Covered Services, and Section VI, Behavioral Health Care, and Attachment I (see below).

> "The method for calculating the MLR shall meet the following criteria:
>
> a) Except as provided in paragraphs (b) and (c), expenditures shall be classified in a manner consistent with 45 CFR Part 158.
>
> b) Funds provided by plans to graduate medical education institutions to underwrite the costs of residency positions shall be classified as medical expenditures, provided the funding is sufficient to sustain the position for the number of years necessary to complete the residency requirements and the residency positions funded by the plans are active providers of care to Medicaid and uninsured patients.
>
> c) Prior to final determination of the medical loss ratio for any period, a plan may contribute to a designated state trust for the purpose of supporting Medicaid and indigent care and have the contribution counted as a medical expenditure for the period."

There have been no additional changes to the MLR reporting requirements or reporting template during this quarter.

6. On-Site Surveys and Desk Reviews

During this quarter, the Agency did not conduct on-site surveys of the health plans. The Agency continued to conduct desk reviews of health plan provider networks for adequacy; review financial reports; review medical, behavioral health, and fraud and abuse policies and procedures; and review and approve performance improvement projects, quality improvement plans, disease management programs, member and provider materials and handbooks. Table 13 provides the list of on-site survey categories that may be reviewed during an on-site visit.

Table 13

B. Choice Counseling Program

Overview

A continual goal of the demonstration is to empower recipients to take responsibility for their own health care by providing information needed to make the most informed decisions about health plan choices.

Current Activities

1. Choice Selection Tools

The current enrollment system, referred to as Health Track, allows the choice counselor to provide basic information to the recipients on how well each plan meets his or her health needs when making a health plan selection. The system compares the preferred drug list (PDL), as well as primary care physician (PCP), specialist and hospital network information. This feature is also available to recipients by accessing the online enrollment website.

A brief description of each choice selection tool is outlined as follows:

- **PDL Comparison**: Each health plan's PDL is compared against the recipient's prescribed drug claims history, as well as any additional list of medications provided to the choice counselor by the recipient.
- **PCP Comparison**: Each health plan's provider network file is searched simultaneously for the name of PCPs provided by the recipient.
- **Specialist Comparison**: Each health plan's provider network file is searched simultaneously for the name of specialists provided by the recipient.
- **Hospital Comparison**: Each health plan's provider network file is searched simultaneously for the name of hospitals provided by the recipient.

PDL information is updated quarterly, prescription claims information is updated daily and provider network files are updated monthly, at a minimum.

Upon entering the search criteria for each choice selection tool, the system returns the results in an easy to read format, which sorts the health plans by those that meet the most of the recipients' criteria to those that meet the least amount of criteria, as shown in Chart A located on the following page.

Remainder of page intentionally left blank.

Chart A
Illustration of Choice Selection Tools in Health Track Enrollment System

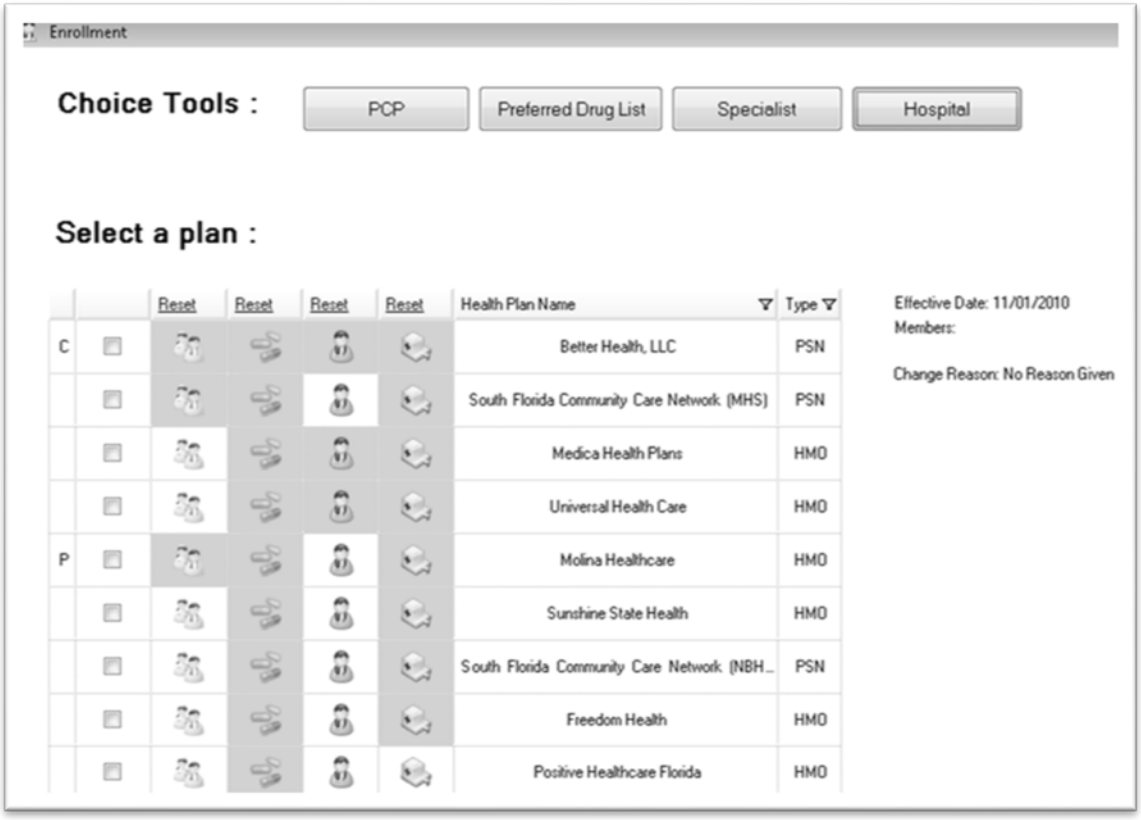

Chart B represents the number of times each choice selection tool was utilized during the enrollment or plan change process for this quarter. The results are broken out by choice tool type.

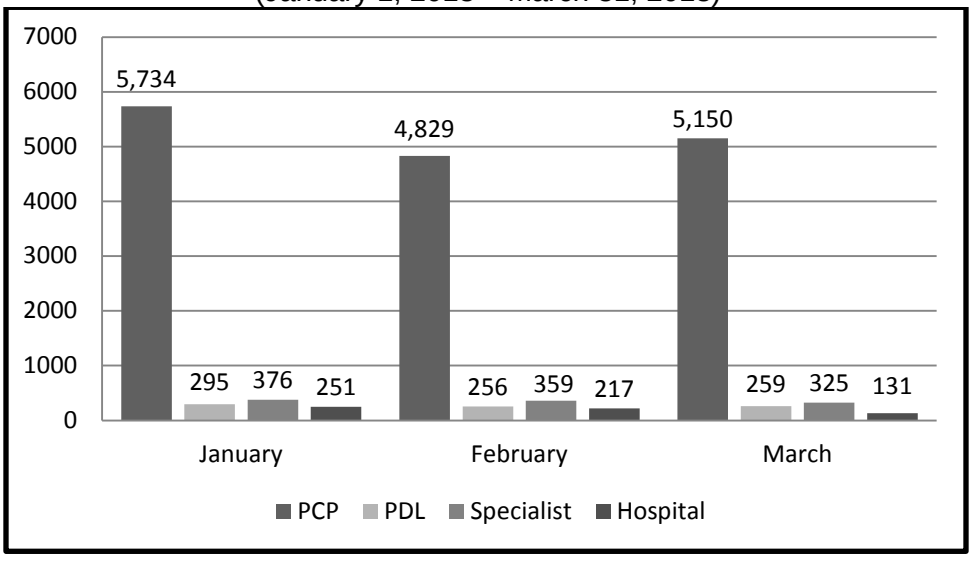
Chart B
Choice Tool Use by Type
(January 1, 2013 – March 31, 2013)



2. Online Enrollment

Table 14 shows the number of online enrollments by month for this quarter. The Agency continues to work on increasing recipient awareness of the availability of online enrollment.

Table 14
Online Enrollment Statistics
(January 1, 2013 – March 31, 2013)

	January	February	March
Enrollments	918	811	869

3. Call Center

The choice counseling call center, located in Tallahassee, Florida, operates a toll-free number and a separate toll-free number for the hearing-impaired callers. The call center uses a tele-interpreter language line to assist with calls in over 100 languages. The hours of operation are Monday through Thursday 8:00a.m. – 8:00p.m., Friday 8:00a.m. – 7:00p.m., and Saturday 9:00a.m. – 1:00p.m. During this quarter, the call center had an average of 29 full time equivalent employees who speak English, Spanish and Haitian Creole to answer calls.

The choice counseling call center received 44,144 calls during this quarter, which remains within the normal call volume. Table 15 compares the call volume of incoming and outgoing calls during the second quarter of Demonstration Years Six and Seven.

Table 15
Comparison of Call Volume for Third Quarter
(Demonstration Years Six and Seven)

Type of Calls	Jan 2012	Jan 2013	Feb 2012	Feb 2013	Mar 2012	Mar 2013	Year 6 3rd Quarter Totals	Year 7 3rd Quarter Totals
Incoming Calls	15,912	16,726	14,855	13,591	16,005	13,827	**46,772**	**44,144**
Outgoing Calls	4,892	4,422	5,661	3,908	5,611	3,938	**16,164**	**12,268**
Totals	20,804	21,148	20,516	17,499	21,616	17,765	**62,936**	**56,412**

Outbound and Inbound Mail

During this quarter, the choice counseling vendor mailroom mailed the following:

- New-Eligible Packets (mandatory and voluntary) 21,932
- Confirmation Letters 23,495
- Open Enrollment Packets 56,876
- Transition Packets (mandatory and voluntary) 2,846
- Plan Transfer Letters (mandatory and voluntary) 0

When return mail is received with no forwarding address from the post office, staff access the choice counseling vendor's enrollment system and the FLMMIS to locate a telephone number or a new address in order to contact the recipient. The choice counseling staff re-addresses the packets or letters when possible, with the newly eligible mailings taking top priority.

During this quarter, the choice counseling vendor processed the following inbound mail:

- Plan Enrollments 606
- Plan Changes 30

The percentage of enrollments processed through the mail-in enrollment forms continues to be slightly less than the historical trend of 2 – 5%. Use of the form may continue to decline with increased use of the Online Enrollment Application.

Health Literacy

The choice counseling Special Needs Unit has primary responsibility for the health literacy function. The Special Needs Unit has a Registered Nurse and a Licensed Practical Nurse who have both earned their choice counseling certification.

Summary of cases taken by the Special Needs Unit

A 'case referral' is when a choice counselor refers a case to the Special Needs Unit through the choice counseling vendor's enrollment system (Health Track) or verbally via phone transfer, for follow-up. The Special Needs Unit conducts the research and resolves the referral.

A 'case review' is when the Special Needs Unit helps with questions from a choice counselor as they are on a call. Most reviews can be handled verbally and quickly. Some case reviews may end up as a referral if there is more research and follow-up required by the Special Needs Unit.

During this quarter, the Special Needs Unit documented and reported on the verbal reviews and referrals as shown in Table 16.

Table 16
Number of Referrals and Case Reviews Completed
(January 1, 2013 – March 31, 2013)

	January	February	March
Case Referrals	110	168	168
Case Reviews	103	131	123

The Special Needs Unit staff scope of work includes:

- Development of additional training for the choice counselors working with and serving the medically, mentally or physically complex;
- Enhancements to the scripts to educate recipients on how to access care in a managed care environment;
- Development of health related reference guides to increase the choice counselor's knowledge of Medicaid services (which is ongoing); and
- Participation in the development of the Health Track choice selection tool script.

Face-to-Face/Outreach and Education

The Outreach Team conducts group sessions and makes choice counselors available after the session to assist recipients in plan choices and, if needed, provides the option for face-to-face choice counseling at the recipient's convenience. Table 17 provides the outreach activities that were performed this quarter.

Table 17
Choice Counseling Outreach Activities
(January 1, 2013 – March 31, 2013)

Field Activities	3rd Quarter – Year 7
Group Sessions	295
Private Sessions	17
Home Visits and One-On-One Sessions	21
No Phone List*	651
Outbound Phone List	7,469
Enrollments	6,861
Plan Changes	379

*Attempts made by field choice counselors to contact recipients who do not have a valid phone number in the Health Track System.

The Mental Health Unit

The Mental Health Unit is designed to provide direct support to recipients who access mental health services. The Mental Health Unit completed 12 private sessions for a total of 39 attendees and made 29 community partner visits, as well as 59 calls to community partners in an effort to strengthen and build relationships. A total of 58 partner staff members were trained this quarter.

The Mental Health Unit has increased the number of community partners to over 200 organizations including the following key partnerships:

- Susan B. Anthony Recovery Center in Broward County,
- Bayview Mental Health Facility and Minority Development and Empowerment in Broward County,
- Mental Health Resource Center and River Region Human Services in Duval County,
- Clay County Behavioral Health, and
- Wolfson's Children's Hospital/Community Health in Duval County.

These groups provide mental health and substance abuse services and have been very receptive to working with the choice counselors.

Complaints/Issues

A recipient can file a complaint about the Choice Counseling program either through the choice counseling call center, Medicaid headquarters or the Medicaid area office. The choice

counseling vendor's automated recipient survey allows complaints about the Choice Counseling program to be filed and voice comments can be recorded to describe what occurred on the call. There were no complaints received related to the Choice Counseling program during this quarter. The primary contributing factor to the limited number of complaints is directly tied to the stability of the demonstration and the community presence the field choice counselors provide to resolve issues before they become a complaint, as well as efforts taken by the Agency field staff.

Quality Improvement

Recipient Customer Survey

Every recipient who calls the toll-free choice counseling number is provided the opportunity to complete a survey at the end of the call to rank their satisfaction with the choice counseling call center and the overall service provided by the choice counselors. The call center offers the survey to every recipient who calls to enroll in a plan or to make a plan change. A total of 1,122 recipients completed the automated survey this quarter.

Table 18 shows a list of all questions that are asked during the survey and how recipients ranked their satisfaction (represented in percentages) with the choice counseling call center and the overall service provided by the choice counselors during this quarter. The number of recipients participating in the survey this quarter was as follows: January – 383, February – 299 and March – 440 (totaling 1,122).

Table 18
Choice Counseling Caller Satisfaction Results
Percentage of Satisfied Callers per Question

January 2013	***February 2013***	***March 2013***
How helpful do you find this counseling to be		
89%	90%	85%
Amount of time you waited		
84%	91%	87%
Ease of understanding information		
80%	78%	79%
Likelihood to recommend		
95%	96%	94%
Overall service provided by counselor		
95%	97%	96%
Quickly understood reason		
95%	98%	95%
Ability to help choose plan		
95%	97%	93%
Ability to explain clearly		
95%	97%	94%
Confidence in the information		
94%	96%	95%
Being treated respectfully		
97%	98%	97%

A key component of the Choice Counseling program is a continuous quality improvement effort. One of the primary elements of the quality improvement process involves the automated survey previously mentioned in this report. The survey results and comments help the choice counseling vendor and the Agency improve customer service to Medicaid recipients. It is imperative for recipients to understand their options and make an informed choice.

During this quarter, the survey results indicate that more than 96% are satisfied with the overall service provided by the counselor. In addition, the results indicate that 95% are satisfied with the choice counselor's ability to clearly explain health plan choices, and 97% felt they were treated respectfully.

Survey scores and recipient comments are provided to supervisors and counselors. The positive comments encourage the choice counselor to keep up the good work and the negative comments help to point out possible weaknesses that may require coaching or training. The choice counseling vendor has an internal e-mail box, which enables the Agency and the choice counseling vendor to share information directly to resolve difficult cases, and hold regularly scheduled conference calls.

4. New Eligible Self-Selection Data[1]

From July 2010 to March 2013, 69% of recipients enrolled in the demonstration self-selected a health plan and 31% were auto-assigned.

Table 19 shows the current self-selection and auto-assignment rate for the current quarter.

Table 19
Self-Selection and Auto-Assignment Rate
(January 1, 2013 – March 31, 2013)

	January	February	March
Self-Selected	9,525	10,194	12,599
Auto-Assignment	5,789	4,581	5,030
Total Enrollments	15,314	14,775	17,629
Self-Selected %	62%	69%	71%
Auto-Assignment %	38%	31%	29%

Remainder of page intentionally left blank.

[1] The Agency revised the terminology used to describe voluntary enrollment data to improve clarity and understanding of how the demonstration is working. Instead of referring to new eligible plan selection rate as *"Voluntary Enrollment Rate,"* the data is referred to as *"New Eligible Self-Selection Rate."* The term *"self-selection"* is now used to refer to recipients who choose their own plan and the term *"assigned"* is now used for recipients who do not choose their own plan.

C. Enrollment Data

Current Activities

Monthly Enrollment Reports

The Agency provides a comprehensive monthly enrollment report, which includes the enrollment figures for all health plans in the demonstration. This monthly enrollment data is available on the Agency's website at the following link:
http://ahca.myflorida.com/MCHQ/Managed_Health_Care/MHMO/med_data.shtml

The following is a summary of the monthly enrollment for this quarter, beginning January 1, 2013 and ending March 31, 2013. This section contains the following enrollment reports:

- Medicaid Reform Enrollment Report,
- Medicaid Reform Enrollment by County Report, and
- Medicaid Reform Voluntary Population Enrollment Report.

All health plans located in the five demonstration counties are included in each of the reports. During this quarter, there were a total of 16 health plans – 12 HMOs and four FFS PSNs.

There are two categories of Medicaid recipients who are enrolled in the health plans: Temporary Assistance for Needy Families (TANF) and Supplemental Security Income (SSI). The SSI category is broken down further in the enrollment reports, based on the recipients' eligibility for Medicare. Each enrollment report and the process used to calculate the data they contain are described on the following pages.

1. Medicaid Reform Enrollment Report

The Medicaid Reform Enrollment Report is a complete look at the entire enrollment for the demonstration program for the quarter being reported. Table 20 provides a description of each column in Medicaid Reform Enrollment Report.

Table 20
Medicaid Reform Enrollment Report Column Descriptions

Column Name	Column Description
Plan Name	The name of the Medicaid Reform plan
Plan Type	The plan's type (HMO or PSN)
Number of TANF Enrolled	The number of TANF recipients enrolled with the plan
Number of SSI Enrolled – No Medicare	The number of SSI recipients who are enrolled with the plan and who have no additional Medicare coverage
Number of SSI Enrolled – Medicare Part B	The number of SSI recipients who are enrolled with the plan and who have additional Medicare Part B coverage
Number of SSI Enrolled – Medicare Parts A and B	The number of SSI recipients who are enrolled with the plan and who have additional Medicare Parts A and B coverage
Total Number Enrolled	The total number of recipients enrolled with the plan; TANF and SSI combined
Market Share for Reform	The percentage of the total Medicaid Reform population that the plan's recipient pool accounts for
Enrolled in Previous Quarter	The total number of recipients (TANF and SSI) who were enrolled in the plan during the previous reporting quarter
Percent Change from Previous Quarter	The change in percentage of the plan's enrollment from the previous reporting quarter to the current reporting quarter

The information provided in this report is an unduplicated count of the recipients enrolled in each health plan at any time during the quarter. Please refer to Table 21 for the State Fiscal Year 2012-13, Second Quarter Medicaid Reform Enrollment Report.

Table 21
Medicaid Reform Enrollment
(January 1, 2013 – March 31, 2013)

Plan Name	Plan Type	Number of TANF Enrolled	Number of SSI Enrolled			Total Number Enrolled	Market Share for Reform	Enrolled in Previous Quarter	Percent Change from Previous Quarter

Universal Health Care	HMO	16,407	2,419	2	420	**19,248**	**5.56%**	21,573	-10.78%
HMO Total	**HMO**	**160,421**	**20,405**	**28**	**2,843**	**183,697**	**53.07%**	**178,988**	2.63%
Better Health	PSN	34,906	4,131	1	615	**39,653**	**11.46%**	39,889	-0.59%
CMS	PSN	5,447	3,937	-	25	**9,409**	**2.72%**	9,379	0.32%
First Coast Advantage	PSN	63,484	9,177	5	1,488	**74,154**	**21.42%**	73,962	0.26%
SFCCN	PSN	34,070	4,510	2	641	**39,223**	**11.33%**	39,587	-0.92%
PSN Total	**PSN**	**137,907**	**21,755**	**8**	**2,769**	**162,439**	**46.93%**	**162,817**	-0.23%
Reform Enrollment Totals		**298,328**	**42,160**	**36**	**5,612**	**346,136**	**100.00%**	**341,805**	1.27%

The demonstration market share percentage for each plan is calculated once all recipients have been counted and the total number of recipients enrolled is known.

The enrollment figures for this quarter reflect those recipients who self-selected a health plan, as well as those who were mandatorily assigned. In addition, some Medicaid recipients transferred from non-demonstration health plans to demonstration health plans. There were a total of 346,136 recipients enrolled in the demonstration during this quarter. There were 16 demonstration health plans active during this quarter with market shares ranging from 0.00% (a new plan starting on the last day of the quarter with only one person) to 27.31%.

2. Medicaid Reform Enrollment by County Report

During this quarter, the demonstration remained operational in the five counties: Baker, Broward, Clay, Duval and Nassau. The number of HMOs and PSNs in each of the demonstration counties is listed in Table 22.

Table 22
Number of Reform Health Plans in Demonstration Counties
(January 1, 2013 – March 31, 2013)

County Name	Number of Reform HMOs	Number of Reform PSNs
Baker	**2**	**1**
Broward	**11**	**3**
Clay	**3**	**1**
Duval	**4**	**2**
Nassau	**2**	**1**

The Medicaid Reform Enrollment by County Report is similar to the Medicaid Reform Enrollment Report; however, it has been broken down by county. The demonstration counties are listed alphabetically, beginning with Baker County and ending with Nassau County. For each county, HMOs are listed first, followed by PSNs. Table 23 provides a description of each column in the Medicaid Reform Enrollment by County Report.

Table 23
Medicaid Reform Enrollment by County Report Descriptions

Column Name	Column Description
Plan Name	The name of the Medicaid Reform plan
Plan Type	The plan's type (HMO or PSN)
Plan County	The name of the county the plan operates in (Baker, Broward, Clay, Duval or Nassau)
Number of TANF Enrolled	The number of TANF recipients enrolled with the plan in the county listed
Number of SSI Enrolled - No Medicare	The number of SSI recipients who are enrolled with the plan in the county listed and who have no additional Medicare coverage
Number of SSI Enrolled - Medicare Part B	The number of SSI recipients who are enrolled with the plan in the county listed and who have additional Medicare Part B coverage
Number of SSI Enrolled - Medicare Parts A and B	The number of SSI recipients who are enrolled with the plan in the county listed and who have additional Medicare Parts A and B coverage
Total Number Enrolled	The total number of recipients enrolled with the plan in the county listed; TANF and SSI combined
Market Share for Reform by County	The percentage of the demonstration population in the county listed that the plan's recipient pool accounts for
Enrolled in Previous Quarter	The total number of recipients (TANF and SSI) who were enrolled in the plan in the county listed during the previous reporting quarter
Percent Change from Previous Quarter	The change in percentage of the plan's enrollment from the previous reporting quarter to the current reporting quarter (in the county listed)

Table 24 located on the following page lists, by plan and county, for this quarter and compared to last quarter, the total number of TANF and SSI individuals enrolled and the market share for each county. In addition, the total Medicaid Reform enrollment counts are included at the bottom of the report.

Table 24
Medicaid Reform Enrollment by County Report
(January 1, 2013 – March 31, 2013)

Plan Name	Plan Type	Number of TANF Enrolled	Number of SSI Enrolled			Total Number Enrolled	Market Share For Reform by County	Enrolled in Previous Quarter	Percent Change from Previous Quarter
			No Medicare	Medicare Part B	Medicare Parts A and B				
Baker County

Reform Enrollment Totals		**298,328**	**42,160**	**36**	**5,612**	**346,136**		**341,805**	**1.27%**

As with the Medicaid Reform Enrollment Report, the number of recipients is extracted from the monthly Medicaid eligibility file and is then counted uniquely based on the most recent month in which the recipient was enrolled in a health plan. The unique recipient counts are separated by the counties in which the plans operate.

3. Medicaid Reform Voluntary Population Enrollment Report

The populations identified in Tables 25 and 26 may voluntarily enroll in a Medicaid Reform health plan. The voluntary populations include individuals classified as Foster Care, SOBRA, Refugee, Developmental Disabilities, or Dual-Eligible (enrolled in both Medicaid and Medicare). The Medicaid Reform Voluntary Population Enrollment Report provides a count of both the new and existing recipients in each of these categories who chose to enroll in a Medicaid Reform health plan. "New" enrollees are defined as those recipients who were not part of Medicaid Reform for at least six months prior to the start of the quarter. Table 25 provides a description of each column in this report.

Table 25
Medicaid Reform Voluntary Population Enrollment Report Descriptions

Column Name	Column Description
Plan Name	The name of the Medicaid Reform plan
Plan Type	The plan's type (HMO or PSN)
Plan County	The name of the county the plan operates in (Baker, Broward, Clay, Duval or Nassau)
Foster, SOBRA and Refugee	The number of unique Foster Care, SOBRA, or Refugee recipients who voluntarily enrolled in a plan during the current reporting quarter
Developmental Disabilities	The number of unique recipients diagnosed with a developmental disability who voluntarily enrolled in a plan during the current reporting quarter
Dual-Eligibles	The number of unique dual-eligible recipients who voluntarily enrolled in a plan during the current reporting quarter
Total	The total number of voluntary population recipients who enrolled in Medicaid Reform during the current reporting quarter
Medicaid Reform Total Enrollment	The total number of Medicaid Reform recipients enrolled in the health plan during the reporting quarter

Remainder of page intentionally left blank.

Table 26 lists the number of individuals in the voluntary populations who chose to enroll in the demonstration, as well as the percentage of the Medicaid Reform population that they represent.

D. Enhanced Benefits Account Program

Overview

The Enhanced Benefits Account (EBA) program is designed as an incentive program to promote and reward participation in healthy behaviors. All Medicaid recipients who enroll in a health plan are eligible for the EBA program. No separate application or process is required to enroll in the EBA program.

Recipients enrolled in a health plan may earn up to $125.00 of credits per state fiscal year. Credits are posted to individual accounts that are established and maintained within the Florida Medicaid Fiscal Agent's [HP Enterprise Services, LLC (HP)] pharmacy point of sale system, currently maintained and managed by the HP subcontractor, Magellan. Earned credits may be used to purchase approved health related products and supplies at a Medicaid participating pharmacy. Purchases must be made at the pharmacy prescription counter using the recipient's Medicaid Gold Card or Medicaid identification number and a government issued photo ID.

The credits earned may be carried forward each demonstration year so the recipient does not lose access to accrued credits. Recipients who have earned credits prior to December 2011, and lose Medicaid eligibility for three consecutive years will lose access to their credits. Beginning January 2012, recipients who have earned credits and lose Medicaid eligibility for one year will lose access to their credits.

The Agency approves credits for participation of approved healthy behaviors using date of service, eligibility and approved behavior edits within a database referred to as the Enhanced Benefits Information System (EBIS). All health plans are required to submit monthly reports for their enrollees who have paid claims for an approved healthy behavior within the prior month. These reports are uploaded into the EBIS database for processing and approval. Once a healthy behavior is approved and the appropriate credit is applied, the information is sent to the HP subcontractor, Magellan, to be loaded in the pharmacy point of sale system.

Current Activities

1. Call Center Activities

The enhanced benefits call center, managed by the choice counseling vendor [Automated Health Systems (AHS)], located in Tallahassee, Florida, operates a toll-free number and a toll-free number for hearing impaired callers. The call center answers all inbound calls relating to program questions, provides enhanced benefits account updates on credits earned/used, and assists recipients with utilizing the web-based over-the-counter product list. The call center is staffed with employees who speak English, Spanish and Haitian Creole. In addition, a language line is used to assist with calls in over 100 languages. The hours of operation are Monday – Thursday 8:00a.m. – 8:00p.m., Friday 8:00a.m. – 7:00p.m., and Saturday 9:00a.m. – 1:00p.m.

The Automated Voice Response System (AVRS), implemented in June 2010, provides recipients balance only information. The AVRS continues to be a success as 20,342 calls were handled during this quarter. The call center continues to perform outbound calls to recipients who have not spent any of their enhanced benefits account credits.

Table 27 highlights the enhanced benefits call center activities during this quarter.

Table 27
Highlights of the Enhanced Benefits Call Center Activities
(January 1, 2013 – March 31, 2013)

Enhanced Benefits Call Center Activity	January	February	March
Calls Received	5,976	3,984	4,229
Calls Answered	5,778	3,902	4,092
Abandonment Rate	3.31%	2.06%	3.24%
Average Talk Time (minutes)	3:54	3:41	3:42
Calls Handled by the AVRS	8,772	5,415	6,155
Outbound Calls	37	12	38
Enhanced Benefits Mailroom Activity			
EB Welcome Letters	11,204	12,540	9,407

Healthy Behavior Reports

The Agency receives monthly healthy behavior reports from the health plans as scheduled by the tenth day of each month. The reports are uploaded each month as designed for processing and credit approval. The monthly credit report is then made available to recipients who have completed healthy behavior activities during the month.

Outreach and Education for Recipients

During this quarter, the call center mailed 33,151 welcome letters and 179,655 coupon statements. A flyer or pharmacy billing instructions is periodically included with the coupon statement. The choice counselors continue to provide up-to-date information for recipients regarding their enhanced benefits account balances and the opportunity to earn healthy behavior credits. The choice counseling vendor made 87 outbound calls to recipients who have not utilized their enhanced benefits account credits.

Outreach and Education for Pharmacies

The pharmacy benefits manager, Magellan, provides ongoing technical assistance to pharmacies as needed related to all billing aspects of the EBA program.

Complaints

During this quarter, over 29,853 recipients purchased one or more products with their enhanced benefits credits, and the EBA program received one recipient complaint. Table 28 provides a summary of the complaint received and action taken to address this complaint.

Table 28
Enhanced Benefits Recipient Complaints
(January 1, 2013 – March 31, 2013)

Recipient Complaint	Action Taken
1. A recipient called about their health plan not reporting a healthy behavior.	➲ The Agency contacted the recipient's health plan to have them report the information to the Agency.

2. Enhanced Benefits Statistics

As of the end of this quarter, 13,908 recipients lost EBA eligibility resulting in losing EBA credits, totaling $624,199.10. Table 29 provides the EBA program statistics for this quarter.

Table 29
Enhanced Benefits Account Program Statistics
(January 1, 2013 – March 31, 2013)

Third Quarter Activities – Year Seven		January	February	March
I.	Number of plans submitting reports by month in each county	32	32	30
II.	Number of enrollees who received credit for healthy behaviors by month	48,274	46,153	43,891
III.	Total dollar amount credited to accounts by each month	$1,094,545.00	$1,046,555.00	$1,021,287.50
IV.	Total cumulative dollar amount credited through the end each month	$63,597,041.16	$64,643,596.16	$65,664,883.66
V.	Total dollar amount of credits used each month by date of service	$897,848.63	$622,298.96	$671,837.32
VI.	Total cumulative dollar amount of credits used through the month by date of service	$34,327,296.98	$34,949,595.94	$35,621,433.26
VII.	Total unduplicated number of enrollees who used credits each month	29,852	21,599	22,690

3. Enhanced Benefits Advisory Panel

The EB Advisory Panel meeting was held on January 31, 2013 where program updates were provided to attendees. To view information on previous panel meetings, please visit the Agency's EBA website at the following link:
http://ahca.myflorida.com/Medicaid/medicaid_reform/enhab_ben/enhanced_benefits.shtml

Remainder of page intentionally left blank.

E. Low Income Pool

Overview

One of the fundamental elements of the demonstration is the Low Income Pool (LIP) program. The LIP program was established and maintained by the state to provide government support to safety net providers in the state for the purpose of providing coverage to the Medicaid, underinsured, and uninsured populations. The LIP program is also designed to establish new, or enhance existing, innovative programs that meaningfully enhance the quality of care and the health of low-income populations, as well as increase access for select services for uninsured individuals.

The LIP funds are distributed to safety net providers that meet certain state and federal requirements outlined in the STCs of the waiver. The LIP program consists of a capped annual allotment of $1 billion total computable for each year of the demonstration. Availability of funds for the LIP program in the amount of $1 billion per year is contingent upon milestones being met during each demonstration year in order for the state and providers to have access to 100% of LIP funds. Funds in the LIP program are subject to any penalties that are assessed by Federal CMS for the failure to meet the milestones described in the STCs. The milestones established are intended to enhance the delivery of health care to low-income populations in Florida.

The LIP permissible expenditures, state authorized expenditures, and entities eligible to receive LIP reimbursement are defined in the Reimbursement and Funding Methodology document (RFMD). The RFMD limits LIP payments to allowable costs incurred by providers and require the state to reconcile LIP payments to auditable costs. By February 1, 2012, and each successive February 1st of the renewal period of the waiver, the state must submit an RFMD protocol to ensure that the payment methodologies for distributing LIP funds to providers support the goals of the LIP and those providers receiving LIP payments do not receive payments in excess of their cost of providing services.

The Agency established the LIP Council in accordance with s. 409.911(10), F.S. The LIP Council's purpose is to advise the Agency and Florida Legislature on the financing and distributions of the LIP and related funds. The 2009 Legislature amended the statutory provisions specific to the LIP Council to increase the number of members appointed, as well as specified criteria for the membership. The LIP Council is statutorily directed to:

- Make recommendations on the financing of the LIP and the disproportionate share hospital program and the distribution of their funds.
- Advise the Agency on the development of the low-income pool plan required by the federal Centers for Medicare and Medicaid Services pursuant to the Medicaid reform waiver.
- Advise the Agency on the distribution of hospital funds used to adjust inpatient hospital rates, rebase rates, or otherwise exempt hospitals from reimbursement limits as financed by intergovernmental transfers.
- Submit its findings and recommendations to the Governor and the Legislature no later than February 1 of each year.

Current Activities

1. LIP Council Meetings

During this quarter, the LIP Council held three meetings on January 9, 2013, January 16, 2013 and January 22, 2013. Information including agendas and meeting summaries for previous LIP Council meetings are posted on the Agency's LIP website at the following link: http://ahca.myflorida.com/Medicaid/medicaid_reform/index.shtml.

January 9, 2013 LIP Council Meeting

On January 9, 2013, a LIP Council meeting was held at the Agency located in Tallahassee, Florida and the following items were discussed:

– *Special Terms and Conditions (STCs)*

  The Agency provided an update on the STCs. The Agency listed which STCs have been completed and provided a review of upcoming STCs that have forthcoming due dates.

– *Reimbursement and Funding Methodology Document (RFMD)*

  The Agency provided an update on the RFMD. The RFMD must be approved prior to the release of Demonstration Year Seven (DY7) LIP payments. Approval of the document was received on October 16, 2012.

– *Letters of Agreement (LOAs)*

  The Agency discussed the status of the LOAs and the hospital rate development timeline. The Agency then summarized the ongoing discussion regarding diagnostic related group inpatient reimbursement and the upcoming relationship with the LIP program funding.

– *Presentation of LIP Models*

  Four models were presented relating to SFY 2013-14 distributions and funding of LIP.

– *Diagnostic Related Group (DRG) update*

  A representative of the consulting group, Navigant Healthcare, gave a presentation and answered questions about the inpatient hospital DRG conversion. The representative also provided DRG simulation results by provider for the LIP Council to review.

January 16, 2013 LIP Council Meeting

On January 16, 2013, a LIP Council meeting was held at the Agency located in Tallahassee, Florida and five models were presented relating to SFY 2013-14 distributions and funding of LIP.

January 22, 2013 LIP Council Meeting

On January 22, 2013, a LIP Council meeting was held at the Agency located in Tallahassee, Florida and models were presented.

During this meeting, the Council voted to narrow model consideration from the six remaining models (10, 11, 12, 13, 14, and 15), down to two models (11 and 12). There were two negative votes on this motion. Subsequently, the Council voted to approve Model 11, as modified, as the Council's recommended model for allocation of funds for SFY 2013-14. The specific modifications reflected the inclusion of three new facilities that qualified for exemption status and reflected an updated Intergovernmental Transfer (IGT) funding level from Halifax Health for

LIP and Disproportionate Share Hospital (DSH). There was one negative vote and one abstaining vote on final model selection. The modifications are as follows:

- Finalized Rural DSH limit amounts
- Updated IGT funding level for Halifax Health's DSH
- Exemptions updated using 05, 06 and 07 audited DSH data and July 2012 inpatient and outpatient rates
- The following is a list of the proposed exemption tiers:

• Children's Hospitals	89.967983%
• Public Hospitals	71.967983%
• Statutory Teaching Hospitals	71.967983%
• Trauma Hospitals	67.450583%
• Greater than 15% Charity Care	67.450583%
• CHEP Hospitals, GAA, & Specialty	67.450583%
• Charity Care between 11% and 14.9%	67.450583%
• Trauma Add on	1.5000000%
• Pediatric Add on	1.5000000%

- Several hospitals were affected due to updated audited DSH data:
  - Three additional hospitals now qualify for the 11% tiering: Bartow Memorial, Florida Hospital Zephyrhills and Memorial Hospital Miramar.
  - University of Miami Hospital was moved to statutory teaching from Community Hospital Education Program (CHEP) due to a licensure change.

Future LIP Council Meetings

The LIP Council meetings can be viewed on the Agency's LIP website at the following link: http://ahca.myflorida.com/Medicaid/medicaid_reform/lip/lip.shtml.

The LIP Council anticipates holding meetings regarding SFY 2014-15 once the LIP Council meetings start up again in the first quarter of Demonstration Year Eight.

2. LIP STCs - Reporting Requirements

The following is an abbreviated list of the LIP STCs that required action during this quarter. The complete list of STCs as approved by Federal CMS on December 15, 2011, for the period December 16, 2011 to June 30, 2014, are posted on the Agency's website at the following link: http://ahca.myflorida.com/Medicaid/medicaid_reform/pdf/CMS_STCs_and_Authorities_12-15-2011.pdf

STC #52 – LIP Funds Distributed – All LIP funds must be expended by June 30, 2014. LIP dollars that are lost as a result of penalties or recoupment are surrendered by the state and not recoverable.

STC #53 – LIP Reimbursement and Funding Methodology (RFMD)

- **DY1 – DY3 LIP Reconciliations Finalized –** Federal CMS and the Agency will finalize DY1-DY3 reconciliations within 60 days of the acceptance of the STCs (by March 14, 2012).

- On March 8, 2012, the Agency received a written description from Federal CMS outlining the findings of their review of DY1-DY3 LIP reconciliations.
- During this quarter, Federal CMS did not provide the Agency any feedback or request additional information regarding LIP reconciliations for DY1-DY3.

– **DY4 LIP Reconciliations –** The Agency submitted the LIP reconciliations for DY4 to Federal CMS on May 30, 2012. This quarter, Federal CMS did not provide the Agency any feedback or request additional information regarding LIP reconciliations for DY4.

– **Finalize Modifications to RFMD –** By February 1 of each Demonstration Year, the Agency must submit an RFMD that ensures the payment methodologies for distributing LIP funds to providers supports the goals of the LIP program.

- On January 31, 2012, the Agency submitted the revised RFMD for DY6 to Federal CMS, which only included updated references since the results of Federal CMS's review of DY1-DY3 LIP reconciliations were not available prior to the February 1st submission due date specified in STC #53.
- On May 5, 2012 and June 6, 2012, the Agency submitted a revised RFMD for DY6 to Federal CMS. The revisions to the document were made based on comments from Federal CMS.
- On August 7, 2012, the Agency submitted a revised RFMD for DY6 to Federal CMS. This version included additional changes requested by Federal CMS.
- On September 27, 2012, Federal CMS indicated that the final version of the RFMD for DY6 was routing for final approval.
- On October 16, 2012, Federal CMS gave written approval of the RFMD for DY6.
- During this quarter, the Agency submitted a revised RFMD for DY7 to Federal CMS on January 29, 2013.

– **Claiming LIP Payments –** The Agency may claim LIP payments based on the existing methodology during the 60-day reconciliation finalization period. Claims after that period can only be made on the final RFMD for DY6 as approved by Federal CMS. Changes to the RFMD for DY6 requested by the Agency must be approved by Federal CMS and are only applicable for DY6 LIP expenditures.

- On October 16, 2012, Federal CMS gave written approval of the RFMD for DY6. The Agency can now begin the distribution of DY7 LIP payments.

– **RFMD Protocol –** By February 1, 2012, and each successive February 1st of the waiver renewal period, the state must submit an RFMD protocol to ensure that the payment methodologies for distributing LIP funds to providers supports the goals of the LIP.

- As noted earlier, on October 16, 2012, Federal CMS gave written approval of the RFMD for DY6.

STC #60 – Aggregate LIP Funding – At the beginning of each demonstration year, $1 billion in LIP funds will be available to the state. These amounts will be reduced by any milestone penalties that are assessed by Federal CMS. Penalties will be determined by December 31st of each demonstration year and assessed to the state in the following demonstration year.

STC #61 – LIP Tier-One Milestone

61.a. – Allocation of Funds, Program Development, Implementation for DY7 – DY8

STC #61.a. references $50 million in LIP funds. A total of $35 million appears in the Other Provider Access System category, also known as the non-hospital section, in the SFY 2012-13 General Appropriations Act (GAA) (Primary Care Initiatives per Tier-One Milestone). A total of $20 million will be used for the start-up of new primary care programs and the remaining total of $15 million will be used to meaningfully enhance existing primary care programs. There is a cap of $4 million per grant proposal. The Agency will determine the distribution and requirements for these programs.

The remaining $15 million (Quality Measures) of the $50 million falls under the Special LIP for Hospital Provider Access System category listed in the GAA. This $15 million, or Quality Measures, category is broken down into three smaller amounts. Of the total, $400,000 is provided for the specialty children's hospitals to be distributed based on an allocation methodology incorporating quality measures that shall be developed by the Agency. The second amount is $7,300,000 and shall be allocated using the core measures as determined by Federal CMS. The remaining amount of $7,300,000 shall be distributed equally using the following six outcome measures:

1. Mortality Hospital Risk Adjusted Rate (HRAR) Acute Myocardial Infarction (AMI) without transfers.
2. Mortality HRAR Congestive Heart Failure (CHF)
3. Mortality HRAR Pneumonia
4. Risk Adjusted Readmission Rate (RARR) AMI
5. RARR CHF
6. RARR Pneumonia

Hospitals receiving an allocation in the $35 Million Primary Care Award category are required to enhance existing, or initiate new, quality-or-care initiatives to improve their quality measures and identified patient outcomes. Hospitals are also required to provide documentation of this to the Agency.

- On June 29, 2012, the Agency posted the LIP Primary Care Application for the $35 million (SFY 2012-13) up for bid on the Agency's LIP website at: http://ahca.myflorida.com/Medicaid/medicaid_reform/lip/lip.shtml
- During the first quarter of Demonstration Year Seven, the Agency received 50 applications for the $35 million LIP Primary Care Award and reviewed the proposals.
- During this quarter, the Agency awarded the $35 million LIP Primary Care Award and began the contracting for state share and distributions of the new and enhanced provider projects. For new projects, the Agency awarded seven hospitals, three Federally Qualified Health Centers (FQHCs) and three County Health Departments (CHDs). For enhanced projects, the Agency awarded seven hospitals, five FQHCs and six CHDs.

61.b. – Proposed and Final Schedule for DY6 – DY8 Reconciliations – The state will provide timely submission of all hospital, FQHC and County Health Department LIP reconciliations in the format required per the LIP Reimbursement and Funding Methodology

protocol. The state is required to submit to Federal CMS, within 30 days from the date of formal approval of the waiver extension request, a schedule for the completion of the LIP Provider Access Systems (PAS) reconciliations for the 3-year extension period. Federal CMS will provide comments to the state on the reconciliation schedules within 30 days. The state will submit the final reconciliation schedule to CMS within 60 days of the original submission date.

- On January 14, 2012, the Agency submitted a proposed schedule to Federal CMS. Federal CMS accepted the proposed schedule with no edits on February 27, 2012.

61.c. – Timely Submission of Deliverables – Timely submission of all demonstration deliverables as described in the STCs including the submission of Quarterly and Annual Reports.

- As of March 31, 2013, the Agency submitted all deliverables on schedule as specified in the STCs.

61.d. – Reporting Templates – Within 60 days following the acceptance of the STCs, the state is required to submit templates for the development and submission of an annual "Milestone Statistics and Findings Report" and a "Primary Care and Alternative Delivery Systems Expenditure Report".

- On February 9, 2012, the Agency sent the draft templates to Federal CMS.
- On March 13, 2012, the Agency submitted the final templates to Federal CMS.
- On March 14, 2012, the Agency was notified that Federal CMS had no comments and the final templates were posted on the Agency's LIP website at: http://ahca.myflorida.com/Medicaid/medicaid_reform/lip/lip.shtml.
- The PAS providers are required to submit individual Milestone Reports to the Agency on October 31, 2012. The Agency has received all the Milestone Reports. The data has been reviewed, compiled and given to UF for data analysis. The Agency will send the final *Milestone Statistics and Findings Report* to Federal CMS on April 1, 2013.
- The Primary Care and Alternative Delivery Systems Expenditure Report requires that the providers submit reporting to the Agency by August 31, 2013. The Agency will provide a final report to Federal CMS on January 1, 2014.

STC #62 – LIP Tier-Two Milestones – STC #62 requires the top 15 hospitals receiving LIP funds to choose three initiatives that follow the guidelines of the Three-Part Aim. These hospitals must implement new, or enhance existing, health care initiatives, investments, or activities with the goal of meaningfully improving the quality of care and the health of populations served. The three initiatives should focus on: infrastructure development; innovation and redesign; and population-focused improvement.

- During the third quarter of Demonstration Year Six, the Agency worked with the top 15 hospitals in developing the Three-Tier Initiatives. Each of the 15 hospitals were required to submit three proposals to the Agency, for a total of 45 proposals.
- On April 9, 2012, the Agency submitted 44 proposals to Federal CMS; the 45th proposal was exempted. Federal CMS approved the proposals on June 29, 2012.
- On October 15, 2012, the Agency received the first quarter reporting for the 44 Hospital initiatives.

- On November 20, 2012, the Agency submitted the first quarter reporting for the 44 Hospital initiatives to Federal CMS.
- On December 31, 2012, Federal CMS approved the first quarter reporting for the 44 Hospital initiatives.
- During this quarter, the Agency is reviewing the second quarter reporting for the 44 Hospital initiatives.

F. Monitoring Budget Neutrality

Overview

In accordance with the requirements of the approved Florida 1115 Medicaid Reform Waiver, the state must monitor the status of the program on a fiscal basis. To comply with this requirement, the state will submit waiver templates on the quarterly CMS 64 reports. The submission of the CMS 64 reports will include administrative and service expenditures. For purposes of monitoring the Budget Neutrality of the program, only service expenditures are compared to the projected without-waiver expenditures approved through the waiver.

MEGS

There are three Medicaid Eligibility Groups established through the Budget Neutrality of waiver. Each of these groups is referred to as a MEG.

MEG #1 – SSI Related
MEG #2 – Children and Families
MEG #3 – Low Income Pool program

It should be noted that for MEG 3, the Low Income Pool, there is no specific eligibility group and no per capita measurement. Distributions of funds are made from the Low Income Pool to a variety of Provider Access Systems.

Explanation of Budget Neutrality

The Budget Neutrality for the waiver is based on closed years of historical data using paid claims for services provided to the eligible populations throughout the state. The data is compiled using a date of service method, which is required for 1115 waivers. Using the templates provided by Federal CMS, the historical expenditures and case-months are inserted into the appropriate fields. The historical data template is pre-formulated to calculate the five-year trend for each MEG. This trend is then applied to the most recent year (5^{th} year), which is known as the base year, and projected forward through the waiver period. Additional negotiations were involved in the final Budget Neutrality calculations set forth in the approved waiver packet.

Florida's 1115 Medicaid Reform Waiver is a program that provides all services to the specified populations. If a person is eligible for the waiver, he or she is eligible to receive all services that would otherwise be available under the traditional Medicaid program. There are a few services and populations excluded from the waiver.

To determine if a person is eligible for the waiver, the first step is identifying his or her eligibility category. Each person who applies for and is granted Medicaid eligibility is assigned an eligibility category by the Florida Department of Children and Families. Specific categories are identified for each MEG under the waiver. If the person has one of the identified categories and is not an excluded eligible, he or she is then flagged as eligible for the waiver. Dual eligibles and pregnant women above the TANF eligibility may voluntarily enroll in a Medicaid Reform health plan. All voluntary enrollment member months and expenditures subject to the waiver are included in the reporting and monitoring of Budget Neutrality of the waiver.

Excluded Eligibles:

- Refugee Eligibles
- Dual Eligibles
- Medically Needy
- Pregnant Women above the TANF eligibility (>27% FPL, SOBRA)
- ICF/DD Eligibles
- Unborn Children
- State Mental Facilities (Over Age 65)
- Family Planning Eligibles
- Women with breast or cervical cancer
- MediKids

All expenditures for the flagged eligibles are subject to the Budget Neutrality of the waiver unless the expenditure is identified as one of the following excluded services. These services are specifically excluded from the waiver and the Budget Neutrality calculation.

Excluded Services:

- AIDS Waiver Services
- DD Waiver Services
- Home Safe Net (Behavioral Services)
- Behavioral Health Overlay Services (BHOS)
- ICF/DD Institutional Services
- Family and Supported Living Waiver Services
- Katie Beckett Model Waiver Services
- Brain and Spinal Cord Waiver Services
- School Based Administrative Claiming
- Healthy Start Waiver Services

Expenditure Reporting:

The 1115 Medicaid Reform Waiver requires the Agency to report all expenditures on the quarterly CMS 64 report. Within the report, there are specific templates designed to capture the expenditures by service type paid during the quarter that are subject to the monitoring of the Budget Neutrality. There are three MEGs within the waiver. MEGs 1 and 2 are statewide populations, and MEG 3 is based on Provider Access Systems. Under the design of the waiver, there is a period of transition in which eligibles continue to receive services through Florida's 1915(b) Managed Care Waiver programs. The expenditures for those not enrolled in the 1115 Medicaid Reform Waiver, but eligible for the waiver and enrolled in Florida's 1915(b) Managed Care Waiver, are subject to both the monitoring of the 1915(b) Managed Care Waiver and the 1115 Medicaid Reform Waiver. To identify these eligibles, an additional five templates [one for each of the 1915(b) Managed Care Waiver (MCW) MEGs] have been added to the waiver templates for monitoring purposes.

When preparing for the quarterly CMS 64 report, the following method is applied to extract the appropriate expenditures for MEGs 1 and 2:

I. Eligibles and enrollee member months are identified;

II. Claims data for included services are identified using the list created through 'I' above;

III. The claims data and member months are separated into appropriate categories to report on the waiver forms of the CMS 64 report:

a. MEG #1 SSI – Related
b. MEG #2 Children and Families
c. Reform – Managed Care Waiver SSI – no Medicare
d. Reform – Managed Care Waiver TANF
e. Reform – Managed Care Waiver SOBRA and Foster Children
f. Reform – Managed Care Waiver Age 65 and Older;

IV. Using the paid claims data extracted, the expenditures are identified by service type within each of the groupings in 'III' above and inserted on the appropriate line on the CMS 64 waiver templates;

V. Expenditures that are also identified as Home and Community Based (HCBS) Waiver services are identified and the corresponding HCBS waiver template expenditures are adjusted to reflect the hierarchy of the demonstration waiver reporting.

All queries and work papers related to the quarterly reporting of waiver expenditures on the CMS 64 report are maintained by the Agency. In addition, all identified expenditures for waiver and non-waiver services in total are checked against expenditure reports that are generated and provided to the Agency's Finance and Accounting Unit, which certifies and submits the CMS 64 report. This check sum process allows the state to verify that no expenditures are being duplicated within the multiple templates for waiver and non-waiver services.

Statistics tables below show the current status of the program's Per Capita Cost per Month (PCCM) in comparison to the negotiated PCCM as detailed in STC #76.

Definitions:

- **PCCM** - Calculated per capita cost per month which is the total spend divided by the case months.
- **WOW PCCM** - Is the without waiver PCCM. This is the target that the state cannot exceed in order to maintain Budget Neutrality.
- **Case months** - The months of eligibility for the populations subject to the waiver as defined as included populations in the waiver. In addition, months of eligibility for voluntary enrollees during the period of enrollment within a Medicaid Reform health plan are also included in the case month count.
- **MCW Reform Spend** - Expenditures subject to the Reform Budget Neutrality for those not enrolled in a Reform Health Plan but subject to the Reform Waiver [currently all non-dual-eligibles receiving services through the 1915(b) Managed Care Waiver].
- **Reform Enrolled & Non-MCW Spend** - Expenditures for those enrolled in a Reform Health Plan.
- **Total Spend** - Total of MCW Reform Spend and Reform Enrolled Spend.

The quarterly totals may not equal the sum of the monthly expenditure data due to adjustments for disease management programs, rebates and other adjustments which are made on a quarterly basis. Without the adjustment of drug rebates, the quarterly expenditure reform totals match the expenditures reported on the CMS 64 report, which is the amount that will be used in the monitoring process by Federal CMS.

Current Activities

Budget Neutrality figures included in this report are through the third quarter (January 1, 2013 – March 31, 2013) of Demonstration Year Seven. The 1115 Medicaid Reform Waiver is budget neutral as required by the STCs of the waiver. In accordance with the monitoring and reporting requirements of 1115 demonstration waivers, the Budget Neutrality is tracked by each demonstration year.

Budget Neutrality is calculated on a statewide basis. For counties where Medicaid Reform is operating, the case months and expenditures reported are for enrolled mandatory and voluntary individuals. For counties where Medicaid Reform is not operational, the mandatory population and expenditures are captured and subject to the budget neutrality. However, these individuals receive their services through the Medicaid State Plan, the providers of the 1915(b) Managed Care Waiver and/or providers of 1915(c) Home and Community Based Waivers.

Although this report will show the quarterly expenditures for the quarter in which the expenditure was paid (date of payment), the Budget Neutrality as required by STC #64, is monitored using data based on date of service. The PMPM and demonstration years are tracked by the year in which the expenditure was incurred (date of service). The STCs specify that the Agency will track case months and expenditures for each demonstration year using the date of service for up to two years after the end of the demonstration year.

In the following tables (Tables 30 through 35), both date of service and date of payment data are presented. Tables that provide data on a quarterly basis reflect data based on the date of payment for the expenditure. Tables that provide annual or demonstration year data are based on the date of service for the expenditure.

Table 30 shows the PCCM Targets established in the 1115 Medicaid Reform Waiver as specified in STC #76. These targets will be compared to actual waiver expenditures using date of service tracking and reporting.

Table 30
PCCM Targets

WOW PCCM	MEG 1	MEG 2
DY01	$ 948.79	$ 199.48
DY02	$ 1,024.69	$ 215.44
DY03	$ 1,106.67	$ 232.68
DY04	$ 1,195.20	$ 251.29
DY05	$ 1,290.82	$ 271.39
DY06	$ 1,356.65	$ 285.77
DY07	$1,425.84	$300.92
DY08	$1,498.56	$316.87

Tables 30 through 35 provide the statistics for MEGs 1, 2, and 3 for the period beginning July 1, 2006, and ending March 31, 2013. Case months provided in Tables 31 and 32 for MEGs 1 and 2 are actual eligibility counts as of the last day of each month. The expenditures provided are recorded on a cash basis for the month paid.

* Quarterly expenditure totals may not equal the sum of the monthly expenditures due to quarterly adjustments such as disease management payments. The quarterly expenditure totals match the CMS 64 Report submissions without the adjustment of rebates

For Demonstration Year One, MEG 1 has a PCCM of $972.13 (Table 33), compared to WOW of $948.79 (Table 30), which is 102.46% of the target PCCM for MEG 1. MEG 2 has a PCCM of $160.23 (Table 33), compared to WOW of $199.48 (Table 30), which is 80.32% of the target PCCM for MEG 2.

For Demonstration Year Two, MEG 1 has a PCCM of $1,022.14 (Table 33), compared to WOW of $1,024.69 (Table 30), which is 99.75% of the target PCCM for MEG 1. MEG 2 has a PCCM of $169.85 (Table 33), compared to WOW of $215.44 (Table 30), which is 78.84% of the target PCCM for MEG 2.

For Demonstration Year Three, MEG 1 has a PCCM of $1,057.86 (Table 33), compared to WOW of $1,106.67 (Table 30), which is 95.59% of the target PCCM for MEG 1. MEG 2 has a PCCM of $166.96 (Table 33), compared to WOW of $232.68 (Table 30), which is 71.76% of the target PCCM for MEG 2.

For Demonstration Year Four, MEG 1 has a PCCM of 1077.30 (Table 33), compared to WOW of $1,195.20 (Table 30), which is 90.14% of the target PCCM for MEG 1. MEG 2 has a PCCM of $166.91 (Table 33), compared to WOW of $251.29 (Table 30), which is 66.42% of the target PCCM for MEG 2.

For Demonstration Year Five, MEG 1 has a PCCM of $1,096.58 (Table 33), compared to WOW of $1,290.82 (Table 30), which is 84.95% of the target PCCM for MEG 1. MEG 2 has a PCCM of $167.09 (Table 33), compared to WOW of $271.39 (Table 30), which is 61.557% of the target PCCM for MEG 2.

For Demonstration Year Six, MEG 1 has a PCCM of $1,102.22 (Table 33), compared to WOW of $1,356.65 (Table 30), which is 81.25% of the target PCCM for MEG 1. MEG 2 has a PCCM of $174.05 (Table 33), compared to WOW of $285.77 (Table 30), which is 60.91% of the target PCCM for MEG 2.

For Demonstration Year Seven, MEG 1 has a PCCM of $850.61 (Table 33), compared to WOW of $1425.84 (Table 30), which is 59.66% of the target PCCM for MEG 1. MEG 2 has a PCCM of $163.52 (Table 33), compared to WOW of $300.92 (Table 30), which is 54.34% of the target PCCM for MEG 2.

Tables 33 and 34 provide cumulative expenditures and case months for the reporting period for each demonstration year. The combined PCCM is calculated by weighting MEGs 1 and 2 using the actual case months. In addition, the PCCM targets as provided in the STCs are also weighted using the actual case months.

For Demonstration Year One, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $322.50. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $293.53. Comparing the calculated weighted averages, the actual PCCM is 91.02% of the target PCCM.

For Demonstration Year Two, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $352.88. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $314.60. Comparing the calculated weighted averages, the actual PCCM is 89.15% of the target PCCM.

For Demonstration Year Three, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $372.29. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $309.27. Comparing the calculated weighted averages, the actual PCCM is 83.07% of the target PCCM.

For Demonstration Year Four, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $386.76. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $297.57. Comparing the calculated weighted averages, the actual PCCM is 76.94% of the target PCCM.

For Demonstration Year Five, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $411.05. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $296.25. Comparing the calculated weighted averages, the actual PCCM is 71.72% of the target PCCM.

For Demonstration Year Six, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $432.81. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $301.50. Comparing the calculated weighted averages, the actual PCCM is 69.66% of the target PCCM.

For Demonstration Year Seven, the weighted target PCCM for the reporting period using the actual case months and the MEG specific targets in the STCs (Table 34) is $453.42. The actual PCCM weighted for the reporting period using the actual case months and the MEG specific actual PCCM as provided in Table 34 is $256.67. Comparing the calculated weighted averages, the actual PCCM is 56.61% of the target PCCM.

*DY totals are calculated using date of service data as required in STC #108.

During Demonstration Year Three, the Florida Legislature directed the Agency to carry forward approximately $123 million dollars from the Demonstration Year Three LIP appropriation until an amendment of the STC #105 could be negotiated. Upon approval of the amendment, approximately $123 million dollars in carry forward funding was provided to the Agency through appropriations for Demonstration Year Four. The appropriations for Demonstration Year Four totaled $1,001,250,000 plus the $123,577,163 of carry forward LIP funds for a grand total of $1,124,827,163. Due to the payment process and the reporting period, payments made after June 30, 2010, were not captured in the Fourth Quarter report of Year Four or the Year Four Annual Report. The report for the first quarter of Demonstration Year Five included the final LIP payment totals for Demonstration Year Four.

Remainder of page intentionally left blank.

G. Encounter and Utilization Data

Overview

The Agency is required to capture medical services encounter data for all Medicaid covered services in compliance with Title XIX of the Social Security Act, the Balanced Budget Act of 1997, 42 CFR 438, and Chapters 409 and 641, F.S. In addition, s. 409.91211(3)(p), F.S., requires a risk-adjusted methodology be a component of the rate setting process for capitated payments to the demonstration health plans. Risk adjustment was phased in over a period of three years, using the Medicaid Rx (MedRx) model.

Current Activities

Encounter Data

The Encounter Data Compliance Report uses analytical measures to report the completeness, accuracy, and timeliness of encounter data submissions. The processes for analysis undergo iterative reviews and validation checks. The reports are modified as needed to address any issues and incorporate additional functionality. Encounter Data Compliance Reports were distributed to managed care organizations in January and February of 2013. The January distribution included reports for encounters processed in October 2012 and November 2012. The February distribution included reports for encounters processed in November 2012 and December 2012. Each month, dialogue with the managed care stakeholders initiates refinements that are applied to the measures and to the narrative. The January 2013 Compliance Report was distributed in March 2013.

Enforcing encounter data timeliness compliance demands the ability to accurately distinguish encounter data resubmissions from original submissions. This was accomplished through the design and construction of an encounter data lexicon which uses an arithmetical approach to the elements in the data fields. During this quarter, encounter data analyses showed a very low number of resubmissions. Isolating resubmitted claims from original claims continues to be a topic in brainstorming sessions with Agency staff, the fiscal agent, health plan stakeholders, and Medicaid offices in other states. On March 15, 2013, a workshop with health plans was held, focusing on resubmission of denied encounters. Staff from the bureaus of Medicaid Program Analysis and Medicaid Contract Management as well as staff from the fiscal agent addressed challenges related to successful submission of encounter transactions with representatives of 17 health plans. A second workshop regarding provider errors is scheduled for April 16, 2013.

As a means of determining encounter submission completeness and establishing an encounter volumetric that predicts Medicaid recipient encounter volume to that actually submitted by a health plan, the CDPS (Chronic Disability and Illness Payment System) has been adapted to compute a predicted encounter volumetric, reported by health plans on a month-over-month period. The Medicaid CDPS+Rx v5.3, developed and distributed by the University of California, San Diego, customized for the State of Florida, provides insight into medical service utilization for individuals having common chronic illnesses by age, gender, and aid categories. The diseases are identified through diagnosis codes and NDC (National Drug Codes) existing in medical and pharmacy claims and encounter transactions. The CDPS model, together with an Auto Regressive Integrated Moving Average (ARIMA), a multivariate statistical analysis model, tracks actual health plan submissions using up to 15 data points to predict encounter volume. The volumetric results of the two methods are being cross-validated. Additionally, the computation of CDPS risk scores is being validated against the risk scores produced by the Agency's actuaries for Medicaid RX. Medicaid RX is a service utilization model that uses only

pharmacy claims data. The CDPS methodology is being validated for model fit and predictability using multiple statistical methods and is currently under peer review with the intent of implementation in the May 2013 health plan Compliance Reports.

In January and February 2013, the analysis on specialty care access (see Objective 2 of this report) grouped specialty services by health plan. The specialty services reported are: dermatology, neurology and orthopedics. The May 2013 Compliance Report distribution will include specialty care access.

Rate Setting/Risk Adjustment

Hospital outpatient encounter data was incorporated in the September 2012 through August 2013 rate setting process. Hospital inpatient, pharmacy and mental health encounter data continue to be utilized for rate setting.

National Council for Prescription Drug Program (NCPDP) pharmacy encounter claims for the July 1, 2011 – June 30, 2012 measurement period (paid through September 30, 2012) were provided to the Agency's actuary for use in the MedRx model to generate risk scores for March, April and May 2013.

Remainder of page intentionally left blank.

H. Demonstration Goals

Objective 1: *To ensure there is an increase in the number of plans from which an individual may choose, an increase in the different type of plans, and increased patient satisfaction.*

Broward and Duval Counties

Tables 37 and 38 provide the number and types of health plans the Agency contracted with prior to the implementation of the demonstration.

Table 37
Broward County
Number and Type of Plans
(Pre-Demonstration 2006)

Type of Plan	Number of Plans
HMOs	8
PSNs	1
Total	**9**

Table 38
Duval County
Number and Type of Plans
(Pre-Demonstration 2006)

Type of Plan	Number of Plans
HMOs	2
PSNs	0
Total	**2**

The Agency also contracted with a Pediatric Emergency Room (ER) Diversion program and two Minority Physician Networks (MPNs) that operated as prepaid ambulatory health plans offering enhanced medical management services to recipients enrolled in MediPass, Florida's primary care case management program. One MPN operated in Duval County, and both MPNs operated in Broward County. The Pediatric ER Diversion program operated only in Broward County.

Tables 39 and 40 provide the number and types of health plans the Agency currently has under contract in Broward and Duval Counties.

Table 39
Broward County
Number and Type of Plans
(January 1, 2013 – March 31, 2013)

Type of Plan	Number of Plans
HMOs	11
PSNs	3
Total	**14**

Table 40
Duval County
Number and Type of Plans
(January 1, 2013 – March 31, 2013)

Type of Plan	Number of Plans
HMOs	4
PSNs	2
Total	**6**

Baker, Clay and Nassau Counties

Prior to expansion of the demonstration into Baker, Clay and Nassau Counties on July 1, 2007, the Agency contracted with one MPN that operated in all three counties as a prepaid ambulatory health plan. The Agency had no contracts with HMOs, PSNs or the Pediatric ER Diversion program in these counties.

Currently, the Agency contracts with three HMOs and one PSN, for a total of four health plans in Baker, Clay and/or Nassau Counties.

Health Plan Applications and Expansion Requests

One health plan application and one health plan request to expand to Baker and Nassau Counties remain under Agency review this quarter. See Section A.1 of this report for additional information on the pending applications and expansion request.

Please note that patient satisfaction is addressed in Objective 4.

Objective 2: *To ensure that there is access to services not previously covered and improved access to specialists.*

Access to Services Not Previously Covered

In Year Seven of the demonstration, all of the capitated health plans continue to offer expanded or additional benefits that were not previously covered under Florida's Medicaid State Plan in order to meet the needs of new enrollees. The customized benefit packages and expanded benefits became operational on January 1, 2013 and will remain valid until December 31, 2013, effectively overlapping Years Seven and Eight of the demonstration. These benefit packages include 25 customized benefit packages for the HMOs and ten benefit packages for the FFS PSNs.

The following is a list of the expanded benefits currently offered by the capitated health plans of which the over-the-counter drug benefits and adult preventive benefits are the most frequently offered:

- Over-the-counter drug benefit – $25 per household per month
- Adult preventive dental
- Circumcisions for male newborns
- Additional adult vision
- Nutritional counseling.

Improving Access to Specialists

The demonstration is designed to improve access to specialty care for recipients. Through the contracting process, each health plan is required to provide documentation to the Agency of a network of providers (including specialists) that will guarantee access to care for recipients. As Demonstration Year One ended, the Agency began the first intensive review of the health plan provider network files to evaluate the effectiveness of the demonstration in improving access to specialists. The analysis included the following steps:

1. Identifying the number of unduplicated providers that participate in the demonstration,
2. Identifying providers that were not fee-for-service providers, but now serve recipients as a part of the demonstration,
3. Comparison of plan networks that were operational prior to the demonstration with the demonstration health plan networks at the end of Year One of the waiver, and
4. Comparison of demonstration provider networks to the active FFS providers.

During the third quarter of Demonstration Year Two, the Agency began additional provider network analysis of the Medicaid health plans. Beginning in October 2007, the Agency directed all Medicaid health plans to update their web-based and paper provider directories and to certify

the provider network files that they submit to the Agency on a monthly basis. In addition to listing the providers' types and specialties, these provider network files must include any restrictions on recipient access to providers (e.g., if the provider only accepts current patients, or if they only treat children and women, etc.).

Specialties identified by the Florida Medicaid Area Offices as areas of potential concern regarding access to care were subject to focused reviews of provider network files and provider surveys in Demonstration Year Two through Year Five. Results of these reviews and surveys are provided in earlier quarterly and annual reports.

In Demonstration Year Six, the Agency began developing additional ways to analyze health plan encounter data to assess health care access. The most recent analyses focused on three types of specialty care: orthopedics, neurology and dermatology. The analyses used encounter data to target the number of recipients receiving these specialty services in demonstration counties. This measure applies the recipient utilization per 1,000 eligible recipients. During the first quarter of Demonstration Year Seven, the Agency reviewed and documented methodologies for analyses begun in the last quarter of Year Six, intended for future analytics of access to care and a basis for identifying opportunities for MCO performance improvements. Encounter data improvements intended to enhance the analyses are ongoing. Planning has begun to reach out to the health plans with a project improvement initiative. Health plans will be encouraged to educate and retrain providers to complete provider detail in the appropriate fields on encounter transactions. The accurate completion of specialty fields pertaining to the providers will provide necessary detail and enhance the analyses.

The baselines for SFY 2009-10 and SFY 2010-11 are revised using enhanced analyses and the Annual Reports will demonstrate access to specialists using the refined measures. These enhancements show improvements to the measures due to two factors: (1) Increase in volume of encounter data in the database; and (2) Improvement in filtering and stratifying data to target reform health plan enrollees.

Objective 3: *To improve enrollee outcomes as demonstrated by: (a) improvement in the overall health status of enrollees for select health indicators, (b) reduction in ambulatory sensitive hospitalizations, and (c) decreased utilization of emergency room care.*

(3)(a) Improvement in the overall health status of enrollees for selected health indicators.

The Agency received the fifth year of performance measure submissions from the health plans during the first quarter of Demonstration Year Seven. The following results are highlights of the fifth year of performance measures:

- Of the 34 HEDIS measures for which plans may need to do Performance Measure Action Plans (PMAPs), the statewide average results for the demonstration plans improved for 15 of the measures compared to the previous year. A statewide weighted average for one measure was not calculated for the demonstration plans as only three of the 13 plans had sufficient eligible members to report the measure. Thus, only 33 of the measures have statewide averages for the demonstration plans.
- Demonstration plans' rates for 11 of the measures stayed about the same, while their performance on seven of the measures dropped.
- For 22 of the 33 measures, the statewide average results for the demonstration plans were higher than the average results for the non-demonstration plans. Performance measures with notable improvement include:

- Well-Child Visits in the First 15 Months – 6 or more: the statewide weighted average for demonstration plans increased from 46.5% in 2011 (representing measurement year 2010) to 58.4% in 2012 (representing measurement year 2011).
- Controlling Blood Pressure: the statewide weighted average for demonstration plans increased from 46.3% in 2011 to 52.9% in 2012.
- Frequency of Prenatal Care: the statewide weighted average for demonstration plans increased from 44% in 2011 to 54.4% in 2012.
- Diabetes – HbA1c Poor Control: the statewide weighted average for demonstration plans dropped from 48.6% in 2011 to 43.6% in 2012. Please note that this is an inverse measure, meaning that a lower rate is more desirable.
- Lead Screening in Children: the statewide weighted average for demonstration plans increased from 54.1% in 2011 to 59.6% in 2012.

Results of the fifth year of performance measures can be viewed in Attachment III of this report.

During the second quarter of Demonstration Year Seven, the Agency sent lists of measures requiring PMAPs to the health plans. The PMAPs are required for all measures that scored below the 50th percentile as identified in the National Committee for Quality Assurance's (NCQA) National Means and Percentiles for Medicaid plans. The health plans submitted their PMAPs to the Agency in December 2012 and Agency staff reviewed them.

During this quarter, the Agency obtained the most recent National Means and Percentiles from NCQA in order to compare the Florida Medicaid health plans' performance measure rates to the 2012 Means and Percentiles. On average, the demonstration plans performed better than the national mean for a number of measures.

- For three of the Comprehensive Diabetes Care measure components, the statewide weighted average for demonstration plans was higher than the national mean.
  - LDL Screening: the national mean was 74.9% while the weighted average for demonstration plans was 81.9%.
  - LDL Control: the national mean was 35.2% while the weighted average for demonstration plans was 37.8%.
  - Medical Attention for Nephropathy: the national mean was 77.8% while the weighted average for demonstration plans was 82.3%.
- For the measure Well Child Visits in the 3rd-6th years of life, the weighted average for demonstration plans was 75.5%, which exceeds the national mean of 71.9%.
- For both of the Antidepressant Medication Management rates (acute and continuation), the demonstration plans' weighted averages (57.4% and 43.1%, respectively) exceeded the national means of 51.1% and 34.4%, respectively.
- For the Breast Cancer Screening measure, the demonstration plans' weighted average was 52.3%, while the national mean was 50.4%.
- For the Follow-up Care for Children Prescribed ADHD Medication – Initiation measure, the demonstration plans' weighted average was 44.4% while the national mean was 38.8%.

During the next quarter, the health plans will submit their PMAP progress reports and Agency staff will review them. The Agency will also prepare to receive the health plans' performance measure submissions for calendar year 2012, which are due to the Agency on July 1, 2013.

(3)(b) Reduction in ambulatory sensitive hospitalizations.

The Agency continues to run a model to analyze the utilization of Ambulatory Care Sensitive Conditions (ASCS) using the Agency for Healthcare Research and Quality (AHRQ) quality indicators (QI). The model enables us to analyze the prevalence of ACSCs that lead to preventable hospitalizations. Aggregation of utilization data across multiple fee-for-service and managed care delivery systems enables a comparison by county or by plan. The reports include morbidity scoring (MedRx), utilization by per member per month normalized to report per 1,000 recipients, and a distribution by category of the QI's for statewide (FFS & managed care), reform, non-reform, and per-MCO basis. The model has been updated to support the latest version (4.4) provided by AHRQ.

Reports can be generated for designated Florida counties possessing similar Standard Metropolitan Statistical Areas (SMSA) characteristics, classified as small rural, medium rural, medium urban and large urban. Reports are also generated for a plan to plan comparison.

(3)(c) Decreased utilization of emergency room care.

The Agency uses a model to analyze the utilization of set up departments (ED) based on the New York University ED algorithm. The model is setup to process data, generating comparable results across the fee-for-service recipients and managed care enrollees. The reports include a volumetric with morbidity scoring (MedRx), utilization per member per month per 1,000 recipients, and distribution by reporting ED utilization category on a statewide (FFS & managed care), reform, non-reform and per-MCO basis. Portions of the report are designed to produce a county comparison based on managed care eligible recipient utilization or according to plan member utilization. The model is being updated to support the latest version 2.0 provided by New York University.

The algorithm developed by New York University is used to identify conditions for which an emergency department visit may have been avoided, either through earlier primary care intervention or through access to non-emergency department care settings.

Objective 4: *To ensure that patient satisfaction increases.*

The Agency continues to contract with UF to conduct patient satisfaction surveys of recipients enrolled in the demonstration. The survey instrument used by UF is based on the *Consumer Assessment of Healthcare Providers and Systems* (CAHPS) *Survey*. The CAHPS Survey is one of a family of standardized instruments used widely in the health care industry to assess enrollees' experiences and satisfaction with their health care. UF has adapted the CAHPS telephone survey component by adding questions specific to the demonstration.

During the second quarter of Demonstration Year Seven, UF submitted a comprehensive draft report on CAHPS Survey results to the Agency based on the SFY 2011-12 surveys. This draft report included survey results for both the demonstration and non-demonstration health plans. During this quarter, the Agency provided feedback to UF on the report. In the next quarter, UF will submit the revised report to the Agency and make any final revisions to the report. The Agency will also work with UF to identify which CAHPS Survey items should be included in a

trend analysis report. The results of all other evaluation reports conducted by UF can be viewed at: http://ahca.myflorida.com/Medicaid/quality_management/mrp/contracts/med027/index.shtml.

Objective 5: *To evaluate the impact of the low income pool on increased access for uninsured individuals.*

Prior to the implementation of the demonstration, Florida's State Plan included a hospital Upper Payment Limit (UPL) program that allowed for special Medicaid payments to hospitals for their services to the Medicaid population. The demonstration created the LIP program, which provides for payments to PAS, which may include hospital and non-hospital providers. The inclusion of the new PAS providers allows for increased access to services for the Medicaid, underinsured and uninsured populations. For information on activities that occurred prior to this quarter, please see the previous quarterly and annual reports posted on the Agency's website at the following: http://ahca.myflorida.com/Medicaid/medicaid_reform/index.shtml

Current Activities

STC #61 – Tier-One Milestone

Two reports correspond to STC #61:

- The *Milestone Statistics and Findings Report* covering SFY 2011-12. The Agency collected the quarterly milestone data for this report from the PAS providers. The final deadline for the PAS providers to submit their milestone data to the Agency was on October 31, 2012. The Agency will submit the milestone data through the *Milestone Statistics and Findings Report* on April 1, 2013 to Federal CMS.
- The *Primary Care and Alternative Delivery Systems Expenditure Report*. There are many different primary care and alternative delivery systems operating with LIP funds. Programs range from: Recipients Outreach; Emergency Room Diversion; Insurance Products; Primary Care Extensions; and Disease Management Initiatives. Although each program contains certain measures and reporting that are similar (i.e. Number of recipients served, Number of services provided, Program expenditures), there are also measures that will be unique for each program. These programs are required to submit reporting to the Agency on August 31, 2013. The Agency will submit the data to Federal CMS on January 1, 2014.

Both the *Milestone Statistics and Findings Report* and the *Primary Care and Alternative Delivery Systems Report* will show the increased access to medical care for this population in Florida.

STC #62 – Tier-Two Milestone

STC #62 requires that the top 15 LIP hospitals, which are allocated the largest annual amounts in LIP funding, participate in initiatives that broadly drive from the three overarching goals of Federal CMS' three-part aim:

a) Better care for individuals including safety, effectiveness, patient centeredness, timeliness, efficiency, and equity;
b) Better health for populations by addressing areas such as poor nutrition, physical inactivity, and substance abuse; and
c) Reducing per-capita costs.

These initiatives focus on: infrastructure development; innovation and redesign; and population focused improvement. Participating facilities have implemented new, or enhanced existing,

health care initiatives, investments, or activities with the goal of meaningfully improving the quality of care and the health of populations served (including low income populations) and meet established hospital specific targets, to receive 100 percent of allocated LIP funding.

Tier-Two milestones apply to facilities that receive the largest annual allocations of LIP funds and put at risk 3.5 percent of each of these facilities' annual LIP allocation. The milestones apply to the 15 hospitals which are allocated the largest annual amounts in LIP funding. If the total annual LIP funds allocated for the 15 hospitals do not total at least $700 million, then the population of hospitals must be expanded until $700 million is reached.

The top 15 hospitals were required to select and participate in three initiatives. Federal CMS exempted one facility from providing three initiatives, and requiring only two initiatives; bringing the total number of initiatives required for the top 15 to 44 initiatives or programs. All 44 initiatives were submitted to Federal CMS on April 10, 2012, and the Agency received Federal CMS approval for the 44 initiatives on June 29, 2012. On October 15, 2012, the Agency received the first quarter reporting for the 44 hospital initiatives and submitted the reports to Federal CMS on November 20, 2012. On December 31, 2012, Federal CMS approved the first quarter reporting for the 44 hospital initiatives.

The Agency is currently reviewing second quarter's reporting for the 44 hospital initiatives. The Agency will submit the second, third and fourth quarterly reporting to Federal CMS on September 30, 2013 for the 44 hospital initiatives.

STC #81 – Final Evaluation Plan

The required demonstration evaluation will include specific studies regarding access to care and quality of care as affected by the Tier-One and Tier-Two initiatives. On October 30, 2012, Federal CMS approved the Agency's final evaluation design. When available, the results of the evaluation will be reported under Section I, Evaluation of Medicaid Reform, of this report.

Remainder of page intentionally left blank.

I. Evaluation of Medicaid Reform

Overview

The evaluation of the demonstration is an ongoing process to be conducted during the life of the demonstration. The Agency is required to complete an evaluation design that includes a discussion of the goals, objectives and specific hypotheses that are being tested to determine the impact of the demonstration during the period of approval.

In 2005, the Agency contracted for the initial demonstration evaluation for the period July 1, 2006-June 30, 2011, with an independent entity, the University of Florida (UF). This initial evaluation was a five-year "over-arching" study that presented its major findings in the Final Evaluation Report that was submitted to Federal CMS on December 15, 2011. The report can be viewed on the Agency's website at the following link: http://ahca.myflorida.com/Medicaid/quality_management/mrp/contracts/med027/FL_1115_Final_UF_Eval_Report_12-15-11.pdf.

With the renewal of the demonstration on December 15, 2011, the Agency is required to conduct an evaluation of the demonstration during the renewal period, December 16, 2011 – June 30, 2014. STC #80 required the Agency to submit a draft evaluation design to Federal CMS 120 days (April 14, 2012) after receiving approval to renew the demonstration. STC #81 required Federal CMS to provide comments within 60 days (June 20, 2012) of receiving the draft evaluation design and for the Agency to submit the final evaluation plan to Federal CMS within 60 days (August 11, 2012) of receiving comments from Federal CMS. The Agency submitted the final evaluation design to Federal CMS on August 9, 2012. Federal CMS approved the Agency's final evaluation design on October 30, 2012. Following approval, the final evaluation design was posted on the Agency's website. The final evaluation design included a discussion of the goals, objectives and specific hypotheses that are being tested, including those that focus specifically on target populations for the demonstration.

The Agency's contract with UF for the evaluation of domains i, ii, iii, and v-ix (per the STCs) was executed at the end of October 2012. Due to the contract being executed later than was initially anticipated, Agency staff worked with UF to establish new due dates for several deliverables in the SFY 2012-13.

Current Activities

During this quarter, the Agency executed a contract with Florida International University (FIU) for the evaluation of domain iv (per the STCs). Researchers from FIU came to the Agency and met with staff to discuss the evaluation of the impact of the demonstration as a deterrent to fraud and abuse.

UF completed the LIP *Milestone Statistics and Findings Report* covering SFY 2011-12, which was reviewed and approved by the Agency in March and is scheduled to be submitted to Federal CMS on April 1, 2013.

The Agency provided data and information to UF for other evaluation activities as it was requested. Additional evaluation reports will be completed by the vendors and submitted to the Agency during the fourth quarter of Demonstration Year Seven.

J. Policy and Administrative Issues

Current Activities

The Agency continues to identify and resolve various operational issues for capitated health plans and FFS PSNs. During this quarter, the Agency's internal and external communication processes continue to play a key role in managing and resolving issues effectively and efficiently.

Policy, administrative and operational issues are generally addressed by six different processes:

- Technical Advisory Panel regular meetings
  - The Technical Advisory Panel (TAP) was created by the 2005 Florida Legislature, and appointed by the Agency with the directive of advising the Agency on various implementation issues relative to the demonstration.
- Policy transmittals and "Dear Provider" letters and e-mails
  - Policy transmittals and "Dear Provider" letters and e-mails are used to send key policy and operational information to health plans.
- Health Plan Technical and Operational Issues conference calls
  - These conference calls are used to communicate the Agency's response to issues addressed at a higher level in the TAP meetings and to respond to plan questions posed through e-mail, telephone inquiries and previous technical calls. Previously, these calls occurred biweekly, but with the demonstration being fully operational, the need for biweekly calls has significantly lessened. As discussed with the health plans in June 2010, a decision was made to change to monthly calls beginning in July 2010. Unless a particular need arises for calls to occur more often, the Technical and Operational Issues conference calls are now monthly.

    All health plans are invited to participate, whether they are currently operating in the demonstration counties. Additionally, the calls are publicly noticed in the Florida Administrative Register to allow all interested parties to participate. The Agency staffs these calls with administrative experts in all areas of the demonstration and participants include a variety of stakeholders, such as health plan chief executive staff, government relations and compliance managers, health plan information systems managers, and health plan subcontractors.
- PSN Systems Implementation monthly conference calls
  - These conference calls provide a forum for discussing claims processes and enrollment file issues that are unique to the FFS PSN model. The PSNs are encouraged to submit questions and/or issues in advance in order for systems research to occur internally at the Agency (or between the Agency and the Agency's Medicaid Fiscal Agent). Agency participants included management and key technical staff of the Agency's PSN Policy and Contracting Unit, Data Unit, Bureau of Contract Management, Area Office staff, and Bureau of Managed Health Care staff responsible for monitoring the health plans. PSN participants included managing staff as well as key staff responsible for oversight of claims processing functions and key staff at the PSNs' contracted Third Party Administrators. Unresolved issues include those that are in the systems change queue for implementation and anecdotal issues pending examples to be submitted from PSNs for Agency research. While these calls were originally bi-weekly, then monthly, they now

occur on an as-needed basis. If there is nothing new to report or discuss, then the monthly call is cancelled.

- General amendment/contract overview calls
  - When new contract changes are being considered or are implemented, the Agency holds conference calls with the health plans to discuss the changes. These calls are periodic in nature, depending on the particular items needing discussion.
- Fraud and abuse meetings
  - As an effort to enhance the program integrity function required by contract, the Agency typically holds quarterly meetings with the health plans and other state agencies involved with health care fraud and abuse in order to discuss fraud and abuse initiatives and current health plan processes.

These forums continue to provide excellent discussion and feedback on proposed processes, and provide finalized policy in the form of our "Dear Provider" letters and policy transmittals. Through these forums, the Agency continues its initiatives on process and program improvement. In conference call forums, the focus during this quarter has been on operational updates and information exchange.

Medicaid Reform Technical Advisory Panel

The seven-member TAP met on January 30, 2013. The agenda items focused on the Medicaid Reform encounter data and risk adjustment, Medicaid Reform evaluation, and updates on choice counseling, enhanced benefits and opt out.

Policy Transmittals and "Dear Provider" Letters

During this quarter, there were one "Dear Provider" letter and two policy transmittals released to the health plans. The policy transmittals advised health plans of an ad hoc encounter data request related to child health check-up program services and advised health plans of updated information related to the two-year payment increases to certain providers for primary care services as specified in the Affordable Care Act and 42 CFR sections 438 and 447. The "Dear Provider" letter was targeted to FFS PSNs that wished to be capitated for behavioral health and advised of specific reporting requirements for behavioral health expenditures.

There were also several "Dear Provider" e-mails sent to provide updated information on the Medicaid program. Issues addressed in the "Dear Provider" e-mails included the following:

- Information regarding changes in FFS provider payment rates;
- Information regarding quarterly changes to the electronic Report Guide for the contract covering the period September 1, 2012 through August 31, 2015;
- Notice regarding changes in the submission date for the HIV/AIDS supplemental file due February 2013; and
- Notice to FFS PSNs regarding possible changes in where they would receive electronic remittance claims advice and possible changes in remittance advice file formats.

Technical and Operational Issues Conference Calls

During this quarter, the Agency conducted three Technical and Operational Issues conference calls with health plans and health plan applicants.

Approximately 20 participants attended in person and the popularity of these calls continues to be shown by over 160 phone lines in active use on the calls. The agenda items discussed on this quarter's calls were as follows:

- Direct secure messaging update;
- Health Plan Report Guide updates;
- 2012 Florida Legislature changes to hospital emergency room visits, primary care visits, and home health visits;
- Submission of encounter data;
- Update regarding registering providers in Medicaid;
- Federally-required physician fee increase update;
- Child health check-up program ad hoc report due 2/5/13;
- Update on Universal Health Care, Inc., transition of enrollment; and
- Clarification regarding the Annual Fraud and Abuse Report and notice regarding Medicaid program integrity staff changes.

FFS PSN Systems Implementation Issues Conference Calls

There were two calls held during this quarter, attended by over 40 participants.

A summary of key items addressed on this call included the following:

- Revisions requested by the PSNs in terms of the electronic remittance advice that they receive; and
- Claims processing changes currently in the queue.

In addition to these calls, the Agency continued to coordinate technical assistance between specific providers and their PSNs to assist providers in getting their claims issues addressed. However, while this function is still available, it has been needed only occasionally. Modification of the current claims process (to streamline the claims processing function) for FFS PSNs remains under consideration.

General Amendment/Contract Overview/Training Calls and Meetings

During this quarter, the Agency did not hold meetings regarding the Medicaid Health Plan Contract, except in relation to fraud and abuse as discussed below.

Fraud and Abuse Meetings

During this quarter, the Agency held a fraud and abuse meeting on March 14, 2013, for all health plans. The training was located in Tallahassee, Florida, at the Agency's headquarters. The fraud and abuse meeting included the following:

- Presentations by the Agency on current program integrity projects, Medicaid Health Plan Contract provisions and reporting requirements;
- Government agencies sharing about processes that are integral to the health plans' anti-fraud efforts;

- Discussion about operational issues (Agency site visits, provision of information regarding terminated providers, registration processes); and
- Health plans sharing concerns or needs about more effectively addressing fraud.

Over 80 persons attended the training, with representation from most Medicaid health plans. The next meeting is tentatively scheduled for June 2013 in Miami, Florida.

Remainder of page intentionally left blank.

Attachment I
PSN Complaints/Issues

PSN Complaints/Issues (January 1, 2013 – March 31, 2013)	
PSN Informal Issue	**Action Taken**
1. A PSN enrollee needed assistance in obtaining medication.	The PSN contacted the pharmacy and authorized the medication.
2. A provider complained that a PSN has not paid claims.	The PSN contacted the provider and ask that they submit proof of submission to claims. The provider failed to provide documentation; therefore, the nonpayment of claims was upheld.
3. A PSN enrollee complained that their Primary Care Provider (PCP) does not participate in the new health plan.	The PSN authorized the PCP in the new plan.
4. A PSN enrollee experienced difficulty in obtaining authorization for medication.	The PSN contacted the pharmacy and authorized the necessary medication.
5. A PSN enrollee complained about being denied medication.	The PSN upheld the denial of medication because the enrollee has exceeded the allowable number of refills.
6. The parent of a PSN enrollee complained about being billed for services.	The PSN updated member files and withdrew the charges.
7. A PSN enrollee was denied a higher dosage of medication.	The PSN upheld the denial because the enrollee's PCP did not authorize the higher dosage.
8. The guardian of a PSN enrollee was billed for services.	The PSN updated member files and withdrew the charges to the guardian.
9. A PSN enrollee experienced difficulty in obtaining a timely medical appointment for an emergency procedure.	The PSN made arrangements for an appointment and informed the enrollee.
10. A PSN enrollee was unable to obtain necessary medication.	The PSN contacted the enrollee's PCP and authorized the medication.
11. A provider complained that a PSN has not paid claims.	The PSN processed the claims for payment.
12. A PSN enrollee complained that they are being denied specialized rehabilitation services.	The PSN informed the enrollee that the rehabilitation services requested are not covered.
13. A provider complained that a PSN has repeatedly not paid claims.	The PSN processed the claims for payment.
14. A PSN enrollee experienced difficulty in obtaining a specialist.	The PSN made an appointment at the specialist needed by the enrollee.

Attachment II
HMO Complaints/Issues

HMO Complaints/Issues (January 1, 2013 – March 31, 2013)	
HMO Informal Issue	**Action Taken**
1. An HMO enrollee had issues receiving transportation for their appointments.	The HMO arranged transportation for the next appointment.
2. An HMO enrollee was billed for services.	The HMO adjusted the balance to zero and informed the enrollee of the change.
3. An HMO enrollee requested to be exempt from managed care because they were unhappy with specialists provided.	The HMO found a specialist able to fit the enrollee's needs and informed the enrollee of the information.
4. An HMO enrollee complained about assistance in obtaining medical appointments.	The HMO provided the enrollee with a case manager for assistance.
5. An HMO enrollee requested an out-of-network specialist.	The HMO directed the enrollee to a comparable in-network specialist.
6. An HMO enrollee complained that they are required to purchase medication before a medical procedure.	The HMO contacted the enrollee and informed them of the miscommunication and that they are not required to purchase the medication.
7. An HMO enrollee experienced difficulty in verifying enrollment with the HMO after being admitted to the emergency department.	The HMO contacted the hospital and verified enrollment.
8. An HMO enrollee was unable to obtain dentist appointments.	The HMO contacted the dentist and arranged the appointments.
9. The parent of an HMO enrollee complained that the HMO was unable to help them obtain dental appointments for their three children.	The HMO contacted the parent, updated their member file, and assisted in arranging appointments for all three children.
10. An HMO enrollee experienced difficulty in obtaining medical equipment.	The HMO provided the medical equipment.
11. An HMO enrollee complained about receiving transportation services for medical appointments.	The HMO made arrangements for transportation services.
12. An HMO enrollee needed authorization to see an out-of-network specialist.	The HMO authorized the specialist.
13. An HMO enrollee complained that their PCP was inadequate.	The HMO provided the enrollee with a list of PCPs in their network and allowed them to choose a new one.
14. An HMO enrollee needed assistance in obtaining a specialist.	The HMO assisted the enrollee and made arrangements for an appointment with a specialist.

HMO Complaints/Issues (January 1, 2013 – March 31, 2013)	
HMO Informal Issue	**Action Taken**
15. An HMO enrollee complained that they were unable to obtain transplant services.	The HMO contacted the enrollee and explained the miscommunication. The HMO made an appointment for the transplant service.
16. The parent of an HMO enrollee needed assistance in obtaining a dentist.	The HMO assisted the parent in finding an in-network dentist.
17. An HMO enrollee did not receive any follow-up from a previously filed complaint.	The HMO contacted the enrollee and made arrangements to resolve the issue.
18. An HMO enrollee needed assistance in obtaining a referral for a specialist.	The HMO directed the enrollee to a PCP that could assist them in obtaining a referral.
19. An HMO enrollee experienced difficulty in finding a dentist.	The HMO provided the enrollee with the contact information of an in-network dentist.
20. An HMO enrollee complained about not being admitted into a nursing facility after being discharged from the hospital.	The HMO updated member files and assisted the enrollee in being admitted into a nursing facility.
21. An HMO enrollee was unable to obtain medication.	The HMO contacted the enrollee's PCP and authorized the medication.
22. An HMO enrollee complained about being billed for services.	The HMO denied the claims because the enrollee had reached the annual limit for outpatient services.

* Data are submitted to the Agency by HMOs and PSNs and are audited by NCQA-certified HEDIS auditors. Data do not include Medicaid FFS or MediPass. Each rate presented for Non-Reform (and for Reform) is the weighted mean across Non-Reform (and Reform) health plans, weighted by the number of eligible members each plan has per measure.

** National Mean as published by NCQA, Medicaid product line. The National Mean that is presented is the National Mean for 2012.

*** Annual Dental Visits - only seven of 21 Non-Reform plans cover dental services. Only six of the plans had sufficient denominators to report on this measure in 2012.

**** The specifications for the Appropriate Medications for People with Asthma measure changed this year; therefore, it may not be appropriate to compare results reported in 2012 to prior years.

*****Follow-up Care for Children Prescribed ADHD Medication - Continuation: only three of the 13 Reform plans had sufficient eligible members to report this measure; therefore, no weighted mean has been calculated.
