WALE OF FLORIDA

FLORIDA MEDICAID PRIOR AUTHORIZATION

Antipsychotic (< 6 years of age)

180-day Maximum Approval

Note: Form must be completed in full.

Review Criteria

- The most current antipsychotic prior authorization request form is required for review.
- All relevant sections of the antipsychotic prior authorization form must be complete.
- To calculate the BMI and BMI percentile, the Centers for Disease Control and Prevention (CDC) provides a
 BMI Calculator for Children and Teens that may be accessed at the following link:
 https://www.cdc.gov/healthyweight/bmi/calculator.html
- The evaluation and progress notes must document target symptoms and behaviors.
- Continuation requests require documentation to demonstrate monitoring for movement disorders. Find screening tools (AIMS, DISCUS) at: http://floridabhcenter.org/assessment-scales.html
- Continuation requests require the attachment of the most recent metabolic monitoring labs to include
 - Fasting glucose and fasting lipids.

Clinical Notes

- Psychosocial treatments should precede the use of psychotherapeutic medications and should continue if medications are prescribed.
- Risks and benefits should be carefully considered before prescribing an antipsychotic.
- Prior to starting an antipsychotic medication, baseline measures should be obtained for weight, height, BMI, blood pressure, fasting glucose and fasting lipids.
- Assessments obtained at baseline should be repeated at three months and at least annually to assure safety and efficacy with the use of antipsychotic treatment.
- Fasting glucose and lipids may need to be assessed every six months to provide optimal monitoring in young children.
- Assessment for movement disorders should be performed during the initial titration, at three months and annually.

Florida Medicaid Clinical Guidelines

Access the following guidelines at http://floridabhcenter.org/index.html:

- Principles of Practice Regarding the Use of Psychotropic Medication in Children Under Age 6
- Florida Medicaid Best Practice Psychotherapeutic Medication Guidelines for Children and Adolescents
