Jason Weida, Secretary

Introduction

The Certificate of Need Program Office receives and processes data from several sources in order to produce need projections in accordance with need methodologies and other legal requirements. A certificate of need is required for the establishment of a hospice program or an inpatient hospice facility that is part of a licensed hospice program. Licensed beds designated for inpatient hospice care through contract between an existing health care facility and a licensed hospice program do not require a certificate of need.

Statutory Authority	<i>Chapter 408.031-408.045, Florida Statutes</i>
Hospice Rule	<i>Chapter 59C-1.0355, Florida Administrative Code</i>
Population Projections	<i>Florida Population Estimates, EOG, Published January 2023</i>

Corrections to the data should be reported to James B. McLemore at (850) 412-4401 or james.mclemore@ahca.myflorida.com . For additional information, please contact the following:

Hospice Program Need Methodology

$$\text{Net Need} = \text{HPH} - \text{HP} \geq 350$$

HPH is the projected number of hospice admissions in the service area during the 12-month period beginning at the planning horizon.

HPH is the sum of $(\text{U65C} \times \text{P1}) + (65\text{C} \times \text{P2}) + (\text{U65NC} \times \text{P3}) + (65\text{NC} \times \text{P4})$, where:

U65C is the projected number of service area resident cancer deaths under age 65. U65C is calculated by dividing the current annual number of cancer deaths under age 65 by the current annual total of resident deaths, and multiplying the result by the service area's projected annual total of resident deaths at the planning horizon.

P1 is the projected proportion of U65C who will be hospice patients. P1 is calculated by dividing the current 12-month statewide total of hospice admissions under age 65 with cancer by the current statewide total of deaths under age 65 from cancer.

65C is the projected number of service area resident cancer deaths age 65 and over. 65C is calculated by dividing the current annual number of cancer deaths age 65 and over by the current annual total of resident deaths, and multiplying the result by the service area's projected annual total of resident deaths at the planning horizon.

P2 is the projected proportion of 65C who will be hospice patients. P2 is calculated by dividing the current 12-month statewide total of hospice admissions age 65 and over with cancer by the current statewide total of deaths age 65 and over from cancer.

U65NC is the projected number of service area resident deaths under age 65 from all causes except cancer. U65NC is calculated by dividing the current annual number of deaths under age 65 from all causes except cancer by the current annual total of resident deaths, and multiplying the result by the service area's projected annual total of resident deaths at the planning horizon.

P3 is the projected proportion of U65NC who will be hospice patients. P3 is calculated by dividing the current 12-month statewide total of hospice admissions under age 65 with diagnoses other than cancer by the current statewide total of deaths under age 65 from causes other than cancer.

65NC is the projected number of service area resident deaths age 65 and over from all causes except cancer. 65NC is calculated by dividing the current annual number of deaths age 65 and over from all causes except cancer by the current annual total of resident deaths, and multiplying the result by the service area's projected annual total of resident deaths at the planning horizon.

P4 is the projected proportion of 65NC who will be hospice patients. P4 is calculated by dividing the current 12-month statewide total of hospice admissions age 65 and over with diagnoses other than cancer by the current statewide total of deaths age 65 and over from causes other than cancer.

HP is the number of patients admitted to hospice programs serving an area during the most recent 12-month period, as defined by rule.

350 is the targeted minimum 12-month total of patients admitted to a hospice program.

Regardless of numeric need shown under the above formula, the agency shall not normally approve a new hospice program for a service area unless all hospice programs serving that area have been licensed and were operational for at least 2 years as of 3 weeks prior to publication of the fixed need pool. The agency will not normally approve another hospice program for any service area that has an approved hospice program that is not yet licensed.
