Introduction

Florida's Medicaid program is jointly funded by the federal, state, and local governments. The federal government pays the state for a specified percentage of program expenditures called the Federal Medical Assistance Percentage (FMAP). The state pays for its share primarily through state government appropriations. In addition, local governments annually contribute millions of dollars towards the state share, allowing Medicaid to draw federal dollars for expenditures that would otherwise be funded by state general revenue or not exist. Local government contributions in state fiscal year (SFY) 2023-24 allowed for a federal draw of over \$3.7 billion, supporting approximately \$6.6 billion in Medicaid expenditures. These payments were made to Medicaid providers with an established need for the purpose of serving the Medicaid and other low-income populations.

Specific direction is given to the Agency for Health Care Administration (Agency) to maximize use of local government funds through the "Local Funding Revenue Maximization Act" in s. 409.017, Florida Statutes (F.S.), including a requirement to report (see Appendix A). In addition, s. 409.908(1)(a), F.S., requires the Agency to provide to the Legislature an annual report on local funds used (including those from other state entities) for the purpose of making special payments through the Medicaid inpatient reimbursement methodologies (see Appendix B). This report fulfills the requirements of these two statutes.

Additionally, this report summarizes the total amount of federal matching funds contributed by local funding sources to the Medicaid program for SFY 2023-24. It should be noted that the Agency does not utilize any governmental matching funds or federal funds from block grants, Temporary Assistance to Needy Families, or Child Care and Development Funds.

History

Local government funds have supported the Medicaid program since 1992 beginning with the Disproportionate Share Hospital (DSH) program. The growth of the DSH program and the implementation of the Low-Income Pool (LIP) program increased the need for local government funds in order to sustain these programs. In SFY 1992-93, three local governments participated in funding the Medicaid DSH programs. By SFY 2023-24, 186 local governments assisted in funding several different Medicaid programs. In 1988, there was only one DSH program in existence and there were no supplemental Medicaid payment programs funded by local governments. In SFY 2023-24, the following programs were funded in part or in whole by local government funds:

- Two school-based service reimbursement programs
- LIP program
- Graduate Medical Education (GME) Startup Bonus, High Tertiary, and Primary Care programs
- Physician Hospital Payment (PHP) Program
- Physician Supplemental Payment (PSP) Program
- DSH Program
- Directed Payment Program (DPP)
- Public Emergency Medical Transportation (PEMT) Program
- Florida Cancer Hospital Program (FCHP)
- Indirect Medical Education (IME) Program

General Discussion

During SFY 2023-24, over \$3.7 billion in funds were used as the state share for Medicaid expenditures from local government, certified public funds, and general revenue. Approximately \$2.6 billion in Intergovernmental Transfers (IGTs) were received by the Agency in the form of electronic fund transfers and checks from local governments such as counties, health care taxing districts, and hospital taxing authorities. Certified public funds of over \$189 million were approved during SFY 2023-24. A public fund is considered certified when the contributing public agency certifies that the expenditures are eligible for Federal Financial Participation (FFP) in accordance with Title 42 Code of Federal Regulation (CFR) 433.51. The Agency also received over \$80 million in general revenue to use for IGTs and \$5.3 million in other state funds to use for the state share of payments. The breakdown of funding by local governments can be seen on the tables beginning on page nine of this document. Table 1 displays all funding (IGTs and certified public funds) received and the federal match drawn for the expenditures made during SFY 2023-24.

Local government IGTs and federal matching funds (Medical Care Trust Fund) for SFY 2023-24 were distributed through the following Medicaid programs:

- Low-Income Pool Program
- Graduate Medical Education Programs
- Physician Supplemental Payment Program
- Medicaid Disproportionate Share Hospital Program
- Public Emergency Medical Transportation Program
- Florida Cancer Hospital Program
- Physician Hospital Payment Program
- Directed Payment Program
- Indirect Medical Education Program

These nine programs utilize local matching funds as discussed in the Local Funding Revenue Maximization Act. They are included in this report to fulfill the reporting requirements of s. 409.017 (3)(g), F.S., and s. 409.908(1)(a), F.S., as they describe special exception payments made to hospitals through Medicaid inpatient reimbursement methodologies. This report reflects the eighteenth year of LIP distributions to eligible hospitals, created through the original Medicaid Reform, 1115 Demonstration Waiver, approved by the federal Centers for Medicare and Medicaid Services (CMS) in 2005. The LIP has been continued in the 1115 waiver as it was amended to authorize the Managed Medical Assistance component of the Statewide Managed Medical Assistance program. A ten-year extension of the Florida Managed Medical Assistance Program Waiver was granted on January 15, 2021, extending the waiver until June 30, 2030, with requirements to recalculate LIP payment limits in SFY 2022-23 and again in SFY 2027-28. The recalculation was completed, and CMS has approved a \$2.167 billion LIP program through SFY 2026-27.

The Florida Legislature appropriated spending authority to the Agency for these programs; however, approval from CMS was required prior to distribution. State Plan Amendments (SPAs) for SFY 2023-24 were submitted and subsequently approved by CMS. Similarly, in accordance with Title 42 CFR 438.6(c), directed payment arrangements were submitted, where appropriate, and subsequently approved by CMS. The separate programs are described in the following sections.

School Based Services Program

Direct Fee for Services

Florida school districts and the Florida School for the Deaf and the Blind may enroll as providers of a variety of Medicaid services. Qualified school district staff, or contracted personnel who provide certain health care services to Medicaid eligible students, receive payments consisting of the federal share of the established fee. Types of reimbursable services under this program are as follows: therapy, behavioral, nursing, transportation, and augmentative and communication services.

The state match requirements for this program are Certified Public Expenditures (CPEs) that are certified quarterly by the school district and come from the district's non-federal expenditures. Major sources of the non-federal match are county property taxes and Florida lottery proceeds.

The FFP for the direct fee for service portion of school-based services programs is 57.96% and 42.04% is CPEs. Table 2 provides the estimate of the amount of federal match and CPEs for state match expended during SFY 2023-24. The federal funds for this program were over \$22.7 million. The estimate is based on date of payment rather than date of service.

Administrative Services

Florida school districts and the Florida School for the Deaf and the Blind may also enroll as providers of Medicaid administrative services. Types of administrative activities reimbursed by Medicaid are as follows: Medicaid outreach, eligibility assistance, program planning and development, and care planning and coordination. Qualified school district expenditures are reimbursed quarterly for the federal share.

The match requirements for this program are CPEs that are certified quarterly by the school district and come from the district's non-federal expenditures. Major sources of the non-federal match are county property taxes and Florida lottery proceeds.

The FFP for the administrative portion of school-based services programs is 50% and 50% is CPEs. Table 3 provides the amount of federal and certified state match expended during SFY 2023-24. The federal funds for this program were approximately \$74.6 million.

Low Income Pool Program

In 2005, CMS approved the Medicaid Reform, 1115 Research and Demonstration Waiver Application for the State of Florida. In the original waiver, LIP is, "established to ensure continued government support for the provision of health care services to Medicaid, underinsured and uninsured populations." During the initial five-year waiver period (SFY 2006-07 through SFY 2010-11), the LIP program consisted of a capped annual allotment of \$1 billion total computable for each year. In SFY 2011-12, the Agency was granted a waiver extension until June 30, 2014. On October 15, 2015, the Agency was granted a three-year waiver extension through June 30, 2017, along with new and revised LIP STCs.

During SFY 2016-17, the Agency filed for another waiver renewal and was granted a five-year waiver extension through June 30, 2030. On April 7, 2020, CMS approved the revised STCs which define the parameters of the LIP program. The parameters of LIP were defined in the revised STCs. STC #63b states that "the state and providers that are participating in LIP will provide assurance that LIP claims include only costs associated with UC that is furnished through a charity care program and that adheres to the principles of the HFMA operated by the provider." The LIP qualifying criteria for participation are described in greater detail in the Reimbursement and Funding Methodology document which is incorporated by reference (per

the STCs) into the waiver document. In SFY 2023-24, over \$583 million in funding for the state share of the LIP program is provided through local government entities, such as counties, hospital taxing districts, and other state agencies (see Table 4).

As one of the conditions of LIP, the hospital inpatient Upper Payment Limit (UPL) program was terminated in Florida. The UPL program is a federal limit placed on fee-for-service reimbursement of Medicaid providers. State Medicaid programs cannot claim federal matching dollars for provider payments in excess of the applicable UPL. The UPL was effective from SFY 2000-01 through SFY 2005-06 as a means of ensuring federal reimbursements were distributed to a wider range of hospitals than would have been possible without the limits. The LIP program allows for continued support to many hospitals that may have participated in the UPL, in addition to over 60 additional hospitals that were not UPL participants.

In SFY 2023-24 the LIP program provided government support for safety net providers for the costs of uncompensated charity care for low-income individuals that are uninsured. Each hospital, Medical School Physician Practice, Federally Qualified Health Center, and Behavioral Health Provider that received LIP funds is required to annually submit expenditure documents to the Agency to confirm that the LIP distributions are not in excess of the provider's costs for serving the uninsured populations. In addition, each facility must document the numbers and types of services provided with LIP funding. For SFY 2023-24, \$1,386,881,724 of the \$1,394.804.069 held in reserve per the December 13th, SFY 2023-24 Legislative Budget Commission (LBC) was distributed.

A summary of the various categories of the LIP is provided on Table 5. More detail of SFY 2023-24 (LIP Program Year 18) LIP distributions is provided on Table 6. Additional information regarding the LIP program and updated Reimbursement and Funding Methodology documents may be found on the Agency's website:

<http://ahca.myflorida.com/Medicaid/Finance/finance/LIP-DSH/LIP/index.shtml>

Physician Supplemental Payment Program

The PSP program provides supplemental Medicaid payments to Medicaid providers through the receipt of IGTs. The supplemental payments were paid quarterly to medical school faculty physician practice plans at eligible universities. Payments were based on the calculation of the differential amount between the base Medicaid payment and supplemental payment for allowable Current Procedural Terminology codes.

The total calculation for the SFY 2023-24 PSP program was over \$345.4 million, of which over \$144 million was provided through the receipt of IGTs. A detailed summary of the distributions to each university is provided in Table 7, and a summary of the IGTs provided by local governments is provided in Table 16.

Disproportionate Share Hospital Program

The DSH program was created to compensate hospitals that have provided a disproportionate share of Medicaid or charity care services. Federal law establishes an annual DSH allotment for each state that limits FFP for total statewide DSH payments made to hospitals. Federal law also limits FFP for DSH payments through the hospital specific DSH limit. Under the hospital specific DSH limit, FFP is not available for state DSH payments that are more than the hospital's eligible Uncompensated Care Cost (UCC). UCC is the cost of providing inpatient hospital and outpatient hospital services to Medicaid patients and charity care services, minus the payments received by the hospital from or on the behalf of those patients.

The eight DSH programs in Florida named in sections 409.911-409.9119, F.S. are listed below with their implementation dates:

- Public DSH July 1, 1988
- Provider Service Network DSH July 1, 2009
- Graduate Medical Education DSH July 1, 1991
- Family Practice DSH July 1, 1991
- Specialty DSH July 1, 1997
- Mental Health DSH October 1, 1992
- Rural DSH May 1, 1994
- Specialty Hospitals for Children DSH July 1, 2000

Although these programs exist in statute, legislative funding is required every year in order to enable the Agency to distribute payments. Funding for the Rural DSH / Rural Financial Assistance program was from Grants and Donations (or Other Fraud Recoveries) and the Medical Care Trust Fund. The Mental Health DSH program is for state-owned or operated facilities and is funded by CPEs and the Medical Care Trust Fund. Specialty DSH is also funded by CPEs and the Medical Care Trust Fund. Specialty and Children's DSH funding were not disbursed this year because the eligible providers had already received funding in excess of their hospital specific DSH limit through other supplemental funding programs, namely, the Hospital Directed Payment Program (DPP).

The State began to receive IGTs for the DSH programs (excluding Mental Health DSH) during SFY 1992-93. The state share of IGTs needed to fund SFY 2023-24 DSH was over \$99.4 million. Table 8 indicates the amount that the local government IGTs provided during SFY 2023-24.

For SFY 2023-24, \$331,210,805 of the \$370,187,000 allocated per the SFY 2023-24 General Appropriations Act (GAA) for the DSH program was distributed. A listing of the DSH distributions for SFY 2023-24 is provided in Table 9.

Graduate Medical Education Program

The GME program consists of the Statewide Medicaid Residency program (SMRP); the GME Startup Bonus program; the Slots for Doctors (S4D) program; and the High Tertiary, Primary Care, Psychiatry, and Mental/Behavioral Health programs. Annual funds distributed for the programs total nearly \$426 million. Funding from both General Revenue and the Medical Care Trust Fund constitute the \$191 million payments for the Statewide Medicaid Residency program. The Agency began to receive IGTs for the \$100 million GME Startup Bonus program during the first year of the program category in SFY 2015-16 in accordance with section 409.909(5), F.S. The High Tertiary, and Primary Care programs began in SFY 2018-19 with an additional appropriation of \$45 million. The funding for these programs increased to \$104 million in SFY 2023-24.

The Medical Care Trust Fund and local government IGTs fund the GME Startup Bonus program. The IGTs needed for SFY 2023-24, per the GAA, was over \$33 million. The GME Startup Bonus program provides funding to hospitals with newly accredited physician residency positions or programs in statewide supply-and-demand deficit specialties or subspecialties. Payments of \$42,262,976 were distributed to the two hospitals with the largest number of graduate medical residents in statewide supply-and-demand deficit specialties or subspecialties, per the SFY 2023-24 GAA.

The Slots for Doctors program was authorized in SFY 2023-24 to fund up to \$100,000 per resident, fellow, or intern Full-Time Equivalent (FTE) specialty or subspecialty in a statewide supply/demand deficit associated with a newly created FTE. The state share of the S4D was funded with \$10.7 million in General Revenue and \$14.8 million from the Medical Care Trust Fund. SFY 2023-24 was the first year of this program and 255 FTE slots were funded.

The high tertiary program provides funding to statutory teaching that provide highly specialized tertiary care including: comprehensive stroke and Level 2 adult cardiovascular services; NICU II and III; and adult open heart and have more than 30 FTE residents over the Medicare cap as reported on the providers 2021 fiscal year end CMS-2552 cost report. Payments totaling almost \$66 million were distributed of which more than \$26.7 million was provided through the recipient of IGTs.

In SFY 2023-24 approximately \$16 million in IGTs were provided to fund the GME primary care program. The primary care program provides funding up to \$100,000 per-FTE in primary care and training in Medicaid regions with primary care demand greater than supply by 85% or more as documented in the 2019 IHS Markit Florida Statewide and Regional Physician Workforce Analysis: Estimating Current and Forecasting Future Supply and Demand.

In SFY 2023-24, over half a million dollars were provided through IGTs to support approximately \$1.3 million to Citrus Health Network to fund psychiatry residency slots for Federally Qualified Health Centers that hold continued institutional accreditation from the Accreditation Council for Graduate Medical Education in adult and child psychiatry.

\$1.54 million dollars in IGTs funded \$3.8 million for up to \$200,000 per FTE resident, fellow or intern position in an accredited program who rotates through mental health and behavioral health facilities licensed under section 394, F.S., in SFY 2023-24.

Table 10 provides a listing of the distributions for the SFY 2023-24 GME programs.

Public Emergency Medical Transportation Program

The Public Emergency Medical Transportation (PEMT) program provides supplemental payments to eligible public entities that meet specific requirements and provide emergency medical transportation to Medicaid beneficiaries. Each eligible entity is required to submit as-filed cost reports to the Agency and must provide certification for the total expenditure of funds and certification of the federal financial participation eligibility for the amount claimed.

The state match for the Fee-For-Service (FFS) PEMT program is provided through CPEs. In SFY 2023-24, there were approximately \$29 million CPEs used to draw down over \$40 million in federal funds and covered costs from July 1, 2022, through June 30, 2023.

Beginning in SFY 2020-21, the 2020 GAA directed the Agency to establish a state directed payment program for Emergency Medical Services through the Medicaid managed care plans. The payments are made as a uniform increase calculated as a supplemental per member per month (PMPM) rate. The state match for the PEMT uniform increase payment is provided through IGTs. In SFY 2023-24, over \$81 million was provided to draw down over \$111.7 million in federal funds.

Table 11 provides a listing of the distributions for SFY 2023-24.

Florida Cancer Hospital Program

The Florida Cancer Hospital Program (FCHP) provides supplemental payments to Florida cancer hospitals that meet the criteria in 42 USC s. 1395ww(d)(1)(B)(v). The CMS approved this program through a state plan amendment on March 8, 2018, with a retroactive effective date of October 26, 2017. Providers are reimbursed up to their respective upper payment limit gap for inpatient and outpatient services.

The total payments for the SFY 2023-24 FCHP program were over \$131.4 million, of which approximately \$55.3 million was funded through IGTs. A listing of the FCHP distributions for SFY 2023-24 is provided in Table 12.

Physician Hospital Payment Program

The Physician Hospital Payment (PHP) program provides supplemental payments to qualifying faculty providers who are employed or contracted by a Florida public hospital. The total payments for the SFY 2023-24 PHP program were over \$74.6 million with approximately \$31.4 million funded through IGTs. A listing of the PHP distributions for SFY 2023-24 is provided in Table 13.

Directed Payment Program

The hospital Directed Payment Program (DPP) was created to provide an amount up to the Medicaid shortfall. Medicaid shortfall is the difference between the cost of providing care to Medicaid-eligible patients and the payments received for those services. A separate uniform rate was established for inpatient and outpatient services and for the three identified provider classes: private hospitals, public hospitals, and cancer hospitals. The uniform percentage increases are set by Medicaid region. Within each region, the payment arrangement directs payments equally to all hospitals with each class for hospital services provided by hospitals and paid by Medicaid health plans.

In SFY 2023-24, the DPP program was authorized by the GAA. \$2,712,340,072 was distributed, of which over \$1.14 billion was funded through IGTs. A listing of the DPP distributions for SFY 2023-24 is provided in Table 14.

Indirect Medical Education

The Indirect Medical Education (IME) program was created to support hospitals with residents in the GME program who are training to become physicians. The intent of the IME program is to provide additional funding to hospitals to support these residents. IME covers costs associated with residency programs that may result in higher patient care costs in teaching hospitals relative to non-teaching hospitals. Providers will be reimbursed based on the hospital's IME costs for services provided and may be paid on a quarterly basis.

In SFY 2023-24, \$705,491,843 was distributed pursuant to the IME program, of which over \$296.6 million was funded through IGTs. A listing of the IME distributions for SFY 2023-24 is provided in Table 15.

Conclusion

Local governments provided 44.13% of the state share funding for supplemental Medicaid payments during SFY 2023-24. The Medical Care Trust Fund (federal matching dollars) provided 55.87% of the funding. The joint participation between health care taxing districts,

local governments, and the State of Florida is credited for the continued success in serving the needs of Medicaid beneficiaries as well as uninsured populations in Florida.

This concludes the requirements of s. 409.017(3)(g), F.S., Revenue Maximization Act and s. 409.908, F.S., which states “The agency may receive funds from state entities, including, but not limited to, the Department of Health, local governments, and other local political subdivisions, for the purpose of making special exception payments, including federal matching funds, through the Medicaid inpatient reimbursement methodologies.”

**Table 1
Medicaid Funding from Local Governments and Other State Agencies
SFY 2023-24**

Programs	Category	Local Intergovernmental Transfers	Certified Public Funds	General Revenue	Other State Funds	Total State Share	Medical Care Trust Fund	Total Funds

Appendix A

409.017, F.S.

409.017 Revenue Maximization Act; legislative intent; revenue maximization program. —

(1) *SHORT TITLE.* — This section may be cited as the "Revenue Maximization Act."

(2) *LEGISLATIVE INTENT.* —

(a) *The Legislature recognizes that state funds do not fully utilize federal funding matching opportunities for health and human service's needs. It is the intent of the Legislature to authorize the use of certified local funding for federal matching programs to the fullest extent possible to maximize federal funding of local preventive services and local child development programs in this state. To that end, the Legislature expects that state agencies will take a proactive approach in implementing this legislative priority. It is the further intent of the Legislature that this act shall be revenue neutral with respect to state funds.*

(b) *It is the intent of the Legislature that revenue maximization opportunities using certified local funding shall occur only after available state funds have been utilized to generate matching federal funding for the state.*

(c) *It is the intent of the Legislature that participation in revenue maximization is to be voluntary for local political subdivisions.*

(d) *Except for funds expended pursuant to Title XIX of the Social Security Act, it is the intent of the Legislature that certified local funding for federal matching programs do not supplant or replace state funds. Beginning July 1, 2004, any state funds supplanted or replaced with local tax revenues for Title XIX funds shall be expressly approved in the General Appropriations Act or by the Legislative Budget Commission pursuant to chapter 216.*

(e) *It is the intent of the Legislature that revenue maximization shall not divert existing funds from state agencies that are currently using local funds to maximize matching federal and state funds to the greatest extent possible.*

(f) *It is the intent of the Legislature to encourage and allow any agency to engage, through a competitive procurement process, an entity with expertise in claiming justifiable and appropriate federal funds through revenue maximization efforts both retrospectively and prospectively. This claiming may include, but not be limited to, administrative and services activities that are eligible under federal matching programs.*

(3) *REVENUE MAXIMIZATION PROGRAM.* —

(a) *For purposes of this section, the term "agency" means any state agency or department that is involved in providing health, social, or human services, including, but not limited to, the Agency for Health Care Administration, the Department of Children and Families, the Department of Elderly Affairs, the Department of Juvenile Justice, the Department of Education, and the State Board of Education.*

(b) *The Agency for Health Care Administration may develop a procurement document and procedure to claim administrative federal matching funds for state-provided educational services. The agency shall then competitively procure an entity with appropriate expertise and experience to retrospectively and prospectively maximize federal revenues through administrative claims for federal matching funds for state-provided educational services.*

(c) Each agency shall establish programs and mechanisms designed to maximize the use of local funding for federal programs in accordance with this section.

(d) The use of local matching funds under this section must be limited to public revenue funds of local political subdivisions, including, but not limited to, counties, municipalities, and special districts. To the extent permitted by federal law, funds donated to such local political subdivisions by private entities, such as, but not limited to, the United Way, community foundations or other foundations, and businesses, or by individuals are considered to be public revenue funds available for matching federal funding.

(e) Subject to paragraph (g), any federal reimbursement received as a result of the certification of local matching funds must, unless specifically prohibited by federal law or state law, including the General Appropriations Act, and subject to the availability of specific appropriation and release authority, be returned within 30 days after receipt by the agency by the most expedient means possible to the local political subdivision providing such funding, and the local political subdivision must be provided an annual accounting of federal reimbursements received by the state or its agencies as a result of the certification of the local political subdivision's matching funds. The receipt by a local political subdivision of such matching funds must not in any way influence or be used as a factor in developing any agency's annual operating budget allocation methodology or formula or any subsequent budget amendment allocations or formulas. If necessary, agreements must be made between an agency and the local political subdivision to accomplish that purpose. Such an agreement may provide that the local political subdivision must: verify the eligibility of the local program or programs and the individuals served thereby to qualify for federal matching funds; shall develop and maintain the financial records necessary for documenting the appropriate use of federal funds; shall comply with all applicable state and federal laws, regulations, and rules that regulate such federal services; and shall reimburse the cost of any disallowance of federal funding previously provided to a local political subdivision resulting from the failure of that local political subdivision to comply with applicable state or federal laws, rules, or regulations.

(f) Each agency, as applicable, shall work with local political subdivisions to modify any state plans and to seek and implement any federal waivers necessary to implement this section. If such modifications or waivers require the approval of the Legislature, the agency, as applicable, shall draft such legislation and present it to the President of the Senate and the Speaker of the House of Representatives and to the respective committee chairs of the Senate and the House of Representatives by January 1, 2004, and, as applicable, annually thereafter.

(g) Each agency, as applicable, before funds generated under this section are distributed to any local political subdivision, may deduct the actual administrative cost for implementing and monitoring the local match program; however, such administrative costs may not exceed 5 percent of the total federal reimbursement funding to be provided to the local political subdivision under paragraph (e). To the extent that any other provision of state law applies to the certification of local matching funds for a specific program, the provisions of that statute which relate to administrative costs apply in lieu of the provisions of this paragraph. The failure to remit reimbursement to the local political subdivision will result in the payment of interest, in addition to the amount to be reimbursed at a rate pursuant to s. 55.03(1) on the unpaid amount from the expiration of the 30-day period until payment is received.

(h) Each agency, respectively, shall annually submit to the Governor, the President of the Senate, and the Speaker of the House of Representatives, no later than January 1, a report that documents the specific activities undertaken during the previous fiscal year under this section. The report must include, but is not limited to, a statement of the total amount of federal matching funds generated by local matching funds under this section, reported by federal funding source; the total amount of block grant funds expended during the previous fiscal year, reported by federal funding source; the total amount for federal matching fund programs, including, but

not limited to, Temporary Assistance for Needy Families and Child Care and Development Fund, of unobligated funds and unliquidated funds, both as of the close of the previous federal fiscal year; the amount of unliquidated funds that is in danger of being returned to the Federal Government at the end of the current federal fiscal year; and a detailed plan and timeline for spending any unobligated and unliquidated funds by the end of the current federal fiscal year.

Appendix B

409.908(1)(a), F.S.

The agency may receive funds from state entities, including, but not limited to, the Department of Health, local governments, and other local political subdivisions, for the purpose of making special exception payments, including federal matching funds, through the Medicaid inpatient reimbursement methodologies. Funds received for this purpose shall be separately accounted for and may not be commingled with other state or local funds in any manner. The agency may certify all local governmental funds used as state match under Title XIX of the Social Security Act, to the extent and in the manner authorized under the General Appropriations Act and pursuant to an agreement between the agency and the local governmental entity. In order for the agency to certify such local governmental funds, a local governmental entity must submit a final, executed letter of agreement to the agency, which must be received by October 1 of each fiscal year and provide the total amount of local governmental funds authorized by the entity for that fiscal year under this paragraph, paragraph (b), or the General Appropriations Act. The local governmental entity shall use a certification form prescribed by the agency. At a minimum, the certification form must identify the amount being certified and describe the relationship between the certifying local governmental entity and the local health care provider. The agency shall prepare an annual statement of impact which documents the specific activities undertaken during the previous fiscal year pursuant to this paragraph, to be submitted to the Legislature annually by January 1.
