

DENTAL CARE FOR YOUR CHILD'S HEALTH

Dental Care For Children Ages 0 - 20

TOOTH DECAY IS THE MOST COMMON CHRONIC CHILDHOOD DISEASE.

Florida data shows that about 1 in 4 children ages 5 to 11 have tooth decay. Tooth decay is painful and children with poor oral health are three times more likely to miss school. Pain and infection from toothaches and sores can also make it hard for children to focus in school.

Florida Medicaid wants to make sure your child is healthy and part of being healthy is taking care of your teeth.

These are services that will help your child have healthy teeth, with no cost to you.

Office Visits
Cleanings
Fluoride Application
Sealants
Spacers
Oral Exams
Orthodontics (limited)
X-rays
Fillings and Crowns
Root Canals
Periodontal (Gum) Services
Prosthodontics (From individual to full mouth tooth replacement)
Analgesia and Sedation
Pain Medication

Some services may require permission before the dentist performs the service. This is called a prior authorization.

For more details about dental services, contact your dental plan. If you do not know which Medicaid dental plan you have, please contact our Helpline at **1-877-254-1055**.
