PURPOSE

The Centers for Medicare and Medicaid Services (CMS) published rule (CMS 2249-F) in January 2014 requiring all home and community-based services (HCBS) waivers authorized under Section 1915(c) and programs authorized under 1915(i) of the Social Security Act to comply with home and community based (HCB) settings requirements specified in 42 CFR 441.301(c)4. The rule directed all states to evaluate their current HCB settings and develop a transition plan to demonstrate how the State plans to come into compliance with the requirements outlined in the rule. CMS also included in the rule a requirement for a public notice process for states in order to ensure transparency.

The purpose of this statewide transition plan (STP) plan is to ensure individuals receiving home and community-based services in all of Florida's HCB programs are integrated, and have access to supports, in the community including opportunities to seek employment, work in competitive integrated settings, engage in community life, and control personal resources. The transition plan describes how the State will assess, determine compliance, remediate, and monitor the operations of its HCBS waivers and State Plan programs to achieve and maintain compliance with the HCBS Settings Rule requirements.

OVERVIEW

The Florida Agency for Health Care Administration (Agency) is responsible for administering Florida's HCB programs. The Agency for Persons with Disabilities (APD) is responsible for certain HCB waiver programs operational and monitoring requirements dependent on the program. Florida's HCB waiver programs are being assessed to ensure individuals receiving Medicaid funded HCB services have full access to a home-like environment and community inclusion to the same degree as individuals not receiving Medicaid funded HCB services. Florida will continually assess its waiver programs to ensure that all HCB settings are in compliance with the HCB Settings Rule requirements specified in 42 CFR 441.301(c)4.

Table 1 provides a list of Florida's 1915(c) HCB services waiver programs and the respective operating agencies.

COMPLIANCE ASSESSMENT

1. Overall Programmatic Assessment

To assess the level of compliance with the HCB Setting Rule requirements, Florida assessed the State’s statutory and administrative requirements, managed care contract requirements, waiver and State Plan program monitoring processes, and remediation activities. The assessment was conducted to determine whether HCB settings are either:

- Fully compliant with the HCB Settings Rule
- Non-compliant with the HCB Settings Rule and will require a plan of remediation
- Presumptively Institutional

Based upon the analysis, the Agency determined the State does not have any significant impediments to Florida’s HCB waiver programs coming into compliance with the HCB Settings Rule requirements. The State developed a thorough assessment and monitoring process to ensure settings providing HCB services will be in compliance with the federal requirements by March 2023.

2. Service Assessment

The State assessed the services offered under its HCBS waiver programs. This assessment was completed by reviewing the waiver program service requirements and enrolled recipient case files. Many of Florida’s HCBS waiver programs administer services in the recipient’s home, or in the community at large. The State has determined the waiver programs listed in Table 2 provide services in the recipient’s home and community-based service locations that are accessible to individuals receiving HCBS to the same degree as individuals not receiving HCBS and are therefore compliant with the HCB Settings Rule requirements.

The State monitors waiver program operations annually to ensure recipients continue to receive services in compliant settings.

Table 2 provides the enrollment capacity, number of services, and the settings under which waiver services are provided.

¹ Florida’s authority to continue the State Plan Redirections program (SPA 13-013) ended July 1, 2015.

The Agency has determined services provided under the Long-term Care (LTC) Waiver and the Developmental Disabilities Individual Budgeting (iBudget) Waiver are delivered in settings that will require assessment by the State to determine compliance.

The State developed comprehensive assessment remediation, heightened scrutiny, and monitoring process to ensure impacted provider sites are in compliance with the HCB Settings Rule.

Table 3 provides the enrollment capacity, number of services, and the settings under which waiver services are provided.

³ The State's foster care homes are licensed as a specific type of group home.

⁴ The State closed its sole residential habilitation center in October 2018.

Note: The State obtained authority from CMS to close the following HCBS waiver programs effective January 1, 2018:

- Adult with Cystic Fibrosis Waiver
- Project AIDS Care Waiver
- Traumatic Brain and Spinal Cord Injury Waiver

Regulatory Assessment

The State conducted an assessment of Florida's laws, rules, regulations, standards, and policies to determine whether the State's requirements are consistent with the HCB Settings Rule. The State selected 15 HCB Settings Rule criteria to determine whether the statutes and regulations were in compliance detailed in Attachment 2. Table 4 provides a summary of the criteria and the compliance determination.

Many HCBS providers render services to non-Medicaid recipients. Therefore, it is not the intention of the State to change licensure requirements to become compliant with the HCB Settings Rule. All settings receiving Florida Medicaid reimbursement for HCBS will be required to adhere to the requirements established in the State's HCB Settings Rule, Rule 59G-13.075, Florida Administrative Code (F.A.C.) in order to continue to receive reimbursement for HCBS provided after March 17, 2023. The rule became effective on December 25, 2018. The State's HCBS rule is available at <https://www.flrules.org/gateway/RuleNo.asp?ID=59G-13.075>. The State's HCBS waivers are up to date and compliant with CMS' Final Rule CMS-2296-F. Any deviation from the requirements established in the rule must be justified and documented in recipients' person-centered plan. The State's HCB Settings Rule meets all standards in CMS' Final Rule CMS-2296-F by incorporating the CMS final rule by reference. Assessed providers that are determined to be non-compliant with Rule 59G-13.075, F.A.C. must remediate deficiencies in accordance with a plan of remediation developed by the provider and agreed upon by the Agency or its delegate. Settings that fail to come in compliance within the timeline outlined in their plan of remediation will be ineligible to participate in the provision of HCBS to Florida Medicaid recipients.

The Agency also amended its Statewide Medicaid Managed Care (SMMC) contract to include compliance language for residential and non-residential settings, and the elements of the HCB Settings Rule that were not already present. The amendment was effective on June 1, 2017.

Residential facilities must have residential agreements that comply with section 429 Florida Statutes (F.S.) Attachment II, Exhibit II- B, Section IX.E.3.a.(11), of the SMMC Contract, specifically requires residential agreements between individuals and facilities. The contract is available on the Agency's Web site at:

http://ahca.myflorida.com/medicaid/statewide_mc/model_health_FY18-23.shtml.

The State continues to update existing provider manuals and sub-regulatory guidance to align with the HCB Settings Rule, as necessary. In instances where existing rules and regulations threaten a setting's compliance to CMS' Final Rule CMS-2296-F, the State's HCB Settings Rule 59G-13.075, F.A.C. takes precedence.

3. HCB Setting Assessments

The State assessed residential and non-residential settings providing HCB services including assisted living facilities, adult family care homes, group homes/foster care homes, adult day care centers, adult day training settings and planned residential communities.

The State's setting assessment process includes four separate phases: preliminary assessments, on-site assessments, virtual assessments, and the State's validation. The State's assessment plan was developed using the requirements in the HCB Settings Rule, information gathered during the preliminary assessment, and feedback from stakeholders received during the 30-day public comment period on the draft STP, and public meetings held around the State.

New compliance assessment tools were developed based on the HCB Settings Rule. The State's tools were designed to allow providers and State assessors to review each setting for the standards set forth by CMS. The tools were made available for public comment prior to implementation. Tools are divided into the following sections; each section contains a number of standards settings must meet:

- Residential
 - Section 1: Setting
 - Section 2: Room/Privacy
 - Section 3: Meals
 - Section 4: Activities/Community Integration
 - Section 5: Respect/Rights/Choices
 - Section 6: Other
- Non-Residential
 - Section 1: Community Integration
 - Section 2: Respect/Rights/Choices
 - Section 3: Employment

Please see Attachment 1 for activities and dates associated with the State's assessment activities, and Attachment 3 for the new and revised Residential and Non-Residential HCB Settings Characteristics Assessment Tools.

Phase 1 – Preliminary Assessments

The State reviewed monitoring data relevant to the LTC and iBudget Waivers, including the Department of Elder Affairs (DOEA) 2014 HCB characteristics onsite monitoring data for the LTC Waiver, and annual compliance monitoring results from APD and the contracted Quality Improvement Organization for the iBudget Waiver. Additionally, the State distributed tools to enrolled LTC and iBudget providers rendering HCBS with instructions to self-assess for HCB Settings Rule compliance. Providers who operated multiple HCB settings were required to complete a self-assessment for each setting. The tools were made available electronically and on the State's web sites.

Providers that self-identified as presumptively institutional were able to submit the results of setting assessments to the State electronically. Settings' self-assessment results were made available to APD and the State's Managed Care Plans (Plans) to review the compliance status of HCB settings within their networks with CMS' HCB Settings Rule. Providers who self-identified areas of non-compliance while conducting setting assessments were asked to begin remediation efforts prior to the implementation of Phase 2.

The preliminary assessments allowed the State to field test its tools while gathering information on provider compliance with CMS' HCB Settings Rule. The State's analysis showed the majority of HCB settings either already met the HCB Settings Rule requirements or would be able to achieve full compliance by implementing programmatic changes.

The State conducted on-site assessments during the second phase of its assessment process.

Phase 2 – On-site Assessments

The State had a solid foundation on which to build its assessment process. All LTC Waiver residential and non-residential settings are credentialed and re-credentialed by Plans as part of contractual mandates. The State delegated the assessing of each HCB setting in the state enrolled as an LTC Waiver provider, including settings that participated in the State's Phase 1 – Preliminary Assessment process, to the Plans. Plans underwent rigorous training on the tools and the correct usage of them to the goal of assessing HCB settings for compliance with the HCB Settings Rule. Similarly, all iBudget Waiver residential and non-residential settings are credentialed and re-credentialed by APD. As such, the State delegated the assessing of these settings, including settings that participated in the State's Phase 1- Preliminary Assessment process, to APD. The State's delegates conducted on-site assessments for 100% of HCB settings enrolled in the LTC and iBudget waiver programs. These two waiver programs serve the majority of Florida's HCB population.

The State also assessed its sole residential habilitation center using its assessment tools. This setting has since been closed and recipients relocated due to non-compliance with the HCB Settings Rules and several other State regulations. The State's foster care homes are licensed as a type of group home under the State's licensure regulations, and as such were assessed with the State's licensed group homes.

The State identified all HCB settings contracted with the Plans through the State's Provider Network (PNV) files, which the Plans are required to submit weekly to the State's enrollment broker vendor. For those HCB settings that were contracted with only one managed care plan, the individual setting was assigned to their contracted Plan for assessment. For those HCB settings that were contracted with multiple Plans, the State randomly assigned settings to one of the contracted Plans, ensuring that the facility would be contacted and assessed only once, while distributing the load and responsibility for the assessments amongst the different plans. The plan assignments were distributed in early December 2019. Such a process was not necessary for the iBudget Waiver settings as APD completed all assessments.

The State's delegates used the tools to conduct on-site assessments of HCB settings to determine their compliance with CMS' HCB Settings Rule. At the conclusion of each on-site assessment, the Plans and APD conducted exit interviews with all settings outlining the visit's findings. Based on the assessment, HCB settings were categorized as one of the following:

- Fully compliant with the HCB Settings Rule
- Non-compliant with the HCB Settings Rule requiring a plan of remediation
- Presumptively Institutional

On March 14, 2020, a policy transmittal was issued to the LTC Plans (PT 2020-14), alerting them that until further notice, the Plans must postpone all HCB setting on-site visits conducted for the purpose of assessing compliance with CMS' HCB Setting Rule requirements in the contract due to the COVID-19 public health emergency. Similar messaging was not necessary

for APD and the iBudget Waiver settings as their on-site assessments had been completed prior to March 14, 2020.

Phase 3 – Virtual Assessments

The Phase 2 on-site assessments that began in January 2020 were abruptly suspended in March 2020 due to the COVID-19 public health emergency. The Agency identified a total of 1,149 LTC HCB settings that were required to be compliant with CMS' HCB Settings Rule. During Phase 2, Plans successfully completed the assessment of 972 of the 1,149 HCB settings that had been identified. Phase 3 outlines the State's plan to assess the remaining 177 HCB settings not completed during Phase 2.

The Plans resumed HCB setting assessments of settings enrolled as LTC Waiver providers through virtual means in November 2020. Plans and settings were offered the flexibility to determine the most feasible virtual methods that maintained accuracy of results and safety of recipients. Methods could include Zoom, Microsoft Teams, Facetime and other forms of audiovisual technology. All virtual setting assessments were required to be completed by December 31, 2020. APD did not conduct virtual assessments as the assessment of the iBudget Waiver's HCB settings was completed prior to March of 2020.

Phase 4 – Validation

Utilizing Raosoft technology to ensure statistical significance, the State determined a sample size based on the total number of all HCB settings in the state enrolled as an LTC Waiver provider, as verified by the State's Bureau of Plan Management Operations. The State's validation served as an audit of Plans' assessment of HCB settings to ensure that assessment tools were used in the manner in which the State intended.

The validation sample was comprised equally of both settings that completed self- assessments during Phase 1, as well as settings that were assessed by the Plans in Phase 2. Plans were instructed to submit monthly updates of their assessment progress to facilitate the State's validation process. The validation included two methods of review to ensure accuracy of findings. Methods included the following:

- On-Site Visits: The State selected at random a group of settings representative of 10% of the total sample. These settings were reviewed in person.
- Staff review: The State's Clinical Compliance Monitoring Unit, who have extensive clinical expertise and who monitor HCB services and settings on an on-going basis, reviewed the remainder of the assessments in the sample via desk reviews to ensure the accuracy of the Plans' assessments.

If a Plan was determined to be using the tools incorrectly, they were required to receive technical assistance and additional training on correct tool usage. The State conducts on-going monitoring through quarterly reviews of Plan enrollee case files, as well and Plan credentialing and re-credentialing processes.

APD validated 100% of the iBudget Waiver's HCB settings to ensure the accuracy of its on-site assessments. Attachment 10 provides data relevant to the State's assessment, validation, and remediation processes.

COMMUNITY INTEGRATION

The State ensures that the settings are not being isolated from the community and encourage not only community involvement but the surrounding areas. This is being done by monitoring transportation logs, community calendars maintained by the group homes, Adult Day Training, Adult Day Care and the Assisted Living Facilities. The state also interviewed residents and participants of the aforementioned programs regarding the community activities they are active in.

REMEDIATION

Settings determined to have gaps in compliance with the HCB Settings Rule during on-site or virtual assessments are required to develop a remediation plan based on the deficiencies identified. The State developed a comprehensive remediation strategy designed to optimize cooperation and consultation between the State and HCB settings, while minimizing any potentially negative impact on recipients who receive services in HCB settings. The remediation strategy allows ample time for providers to remediate deficiencies to comply with the HCB Settings Rule. Remediation plans are highly individualized, outlining the steps and timeframes towards settings achieving compliance.

The State's delegate will review the settings' remediation plans through desk reviews using notes from on-site assessment for reference. This review determines whether the settings' remediation plans adequately remediate deficiencies found during the on-site assessment. Plans or APD, as applicable, must approve provider remediation plans prior to implementation. See Attachment 7 for the Remediation Plan templates.

For settings that do not comply with the HCB Settings Rule and require modifications, the State's delegate initiates the following remediation steps:

- The State's delegate sends written findings and a compliance determination to the provider based on the assessment within seven (7) business days of the initial assessment.
- The provider must respond with a remediation plan using the provided remediation plan template within ten (10) days of receipt of the State's delegate's compliance findings, and to seek technical assistance if necessary.
- The State's delegate approves the provider remediation plan and monitors its implementation progress. Remediation plans may be modified with State approval throughout the implementation process.

- Providers requiring extended periods to complete the remediation plan, must submit monthly status updates.
- The State's delegate reassess the setting at the end of the implementation period identified in the remediation plan to ensure compliance.

The suitable course of action for provider sites that remain non-compliant is determined on a case-by-case basis. Options include:

- Continuing to collaborate with the provider to remediate outstanding issues until April 1st, 2022.
- The State's delegate sends a final compliance order detailing how and when it expects the provider to come into compliance immediately following the implementation period agreed upon in the remediation plan.
- Terminating the provider from the HCB waiver program by September 2022 and transitioning recipients to compliant settings in December of 2022.

There are more than 280 adult day training (ADT) facilities enrolled as Medicaid waiver service providers throughout the state. Adult day training is a bundled day habilitation service that encompasses several services including: skill development, therapies, behavioral supports, transportation, community integration, and on-the-job training. The State's ADTs are partially compliant with CMS' HCB Settings Rule as recipients' rights are protected and autonomy maintained, however, settings lack the comprehensive processes to provide access to competitive integrated employment and tend to operate as a referral source to community entities like Vocational Rehabilitation (VR) instead. To remediate this issue the State has worked closely with VR to develop policies and processes to communicate the outcome of the VR references. These policies and procedures support the individual with other waiver services that ensure employment preparation and community integration. To remediate this issue, the State proposes a tiered standard approach to day training and habilitation services.

Other ADT remediation strategies include the un-bundling of the pre-vocational services and the day habilitation services to make two distinct services. The newly developed prevocational service will include time limits, and a focus on community integrated employment.

The State's remediation plan and next steps will be submitted to CMS as a waiver amendment.

PRESUMPTIVELY INSTITUTIONAL SETTINGS AND HEIGHTENED SCRUTINY

For settings that are determined to be presumptively institutional, the State will implement a case-by-case intensified review process to determine whether the setting:

- Is located in a building that is also a publicly or privately operated facility that provides inpatient institutional treatment.
- Is in a building on the grounds of, or immediately adjacent to, a public institution.

- Has the effect of isolating individuals receiving Medicaid HCB services from the broader community of individuals not receiving Medicaid HCB services.

Settings that are preliminarily identified as potentially meeting the presumptive institutional criteria will receive written findings and a copy of the assessor’s completed report.

Settings may submit additional evidence and documentation to the State or its designee demonstrating the setting does not meet the presumptive institutional criteria, or that despite the setting having qualities of an institution, the individuals receiving HCB services are integrated into the greater community in accordance CMS’ HCB Settings Rule. See Attachment 11 for a preliminary list of settings the State has determined may meet one, or more, of the presumptively institutional criteria specified by CMS.

Table 5 reflects the findings for the two presumptively institutional settings identified:

Table 5 Presumptively Institutional Settings Findings⁴	
Criteria	Number of Settings
A: The setting is located in a building that is also a publicly or privately operated facility that provides inpatient institutional treatment.	1
B: The setting is in a building on the grounds of, or immediately adjacent to, a public institution.	1
C: The setting has the effect of isolating individuals receiving Medicaid HCBS from the broader community.	0

The State will update and publicly notice the STP and notify impacted recipients or their legal representatives, when the list of presumptively institutional settings is updated.

The State or its designee will assess any additional documentation, conduct additional assessments as necessary, and solicit public input from providers, recipients, advocacy groups, and other stakeholders to determine if settings do in fact meet the presumptively institutional criteria. If the State determines through its intensified review that despite the setting having the qualities of an institution, the individuals receiving HCB services are integrated into the greater community in accordance with the HCB Settings Rule, the State will submit this evidence to CMS to conduct its heightened scrutiny process.

⁴ The numbers included here represent findings after CMS released additional presumptively institutional HCB Settings guidance. After additional review, most settings previously identified were able to have the presumptively institutional designation removed.

Settings that do not submit additional information or are still found to meet the presumptively institutional criteria after submitting additional evidence, will be terminated from the applicable HCBS program and impacted recipients will be transitioned to compliant providers.

TRANSITIONING HCBS RECIPIENTS

In the event remediation proves unsuccessful, or a setting is determined to be institutional, it will be necessary to transition impacted recipients to a setting that meets the requirements of the HCB Settings Rule. The State has developed the following protocol for transitioning recipients into compliant settings in a manner that minimizes the impact on the recipient while optimizing their personal choice and care coordination:

- The Agency, or its delegate, will send impacted HCBS recipients or their legal representative a written notice explaining the need for transition, including alternate provider options, and outlining helpful resources.
- Waiver support coordinators/case managers will work with impacted recipients, providers, and the recipient's support group to develop an individualized transition plan with the recipient or their representative.
- Recipients will be monitored during and after transition to ensure their satisfaction with their new service provider, and that their provider maintains compliance with the HCB Settings Rule and that their services continue to meet waiver standards and requirements.
- Recipients who do not want to change providers and receive services in a compliant HCB Setting will be counselled as to the consequences, including but not limited to, identifying non-Medicaid funding to maintain services in the non-compliant setting, or potential dis-enrollment from the HCB program.

MONITORING FOR CONTINUED COMPLIANCE

The State has developed an annual monitoring program that focuses on recipient feedback, provider monitoring, and overall program and regulatory monitoring. The State will use the new and updated HCB Characteristic Assessment tools that address each aspect of the HCB Settings Rule to ensure ongoing compliance. The tools will be reviewed and amended based on lessons learned and monitoring outcomes to ensure their ongoing efficacy, and applicability to the HCB Settings Rule.

The State implemented a process to evaluate the recipient's person-centered plan, and to seek feedback from the recipient and the recipient's family or representative. The focus of this annual

review is to ensure the recipient has the continued opportunity to be active in the community, reside in a home-like environment, and make personal choices.

The State leverages its existing monitoring activities by adding a representative sample of residential and non-residential settings that are reviewed by the State agency responsible for the HCB program's monitoring process.

The State also monitors changes to state laws, rules, regulations, standards, and policy each year. To ensure on-going compliance of the HCB programs with the provisions of the HCB Settings Rule, the State has established the following monitoring principles:

- The State assures continued compliance with the HCB Settings Rule prior to the submission of any waiver or State Plan amendments and renewals.
- Waiver case managers and support coordinators ensure recipients do not receive services in a setting that does not comply with the HCB Settings Rule.
- Medicaid Plans ensure that all HCB service providers in their provider networks operate settings that comply with the HCB Settings Rule through monitoring and their credentialing process.
- The State performs on-going monitoring of residential and non-residential provider settings.
- The State will continue to modify its monitoring activities based on its continuing assessment and public input to ensure full compliance with the HCB Settings Rule.

PLANNED RESIDENTIAL COMMUNITIES

Regardless of the size of the setting, all HCBS providers receiving Medicaid reimbursement for residential or non-residential HCBS will be subject to the requirements established in CMS Final Settings Rule. Florida has several multi-family housing communities for individuals with developmental disabilities. In addition to providing affordable, safe housing options for individuals with developmental disabilities, pursuant to Section 419.001, Florida Statutes, these planned residential communities are required to provide housing options to:

- Frail elders,
- Individuals with a physical impairment which substantially limits one or more major life activities,
- Individuals with an intellectual or developmental disability, or
- Non-dangerous individuals with a mental illness.

To ensure that planned residential communities for individuals with developmental disabilities comply with the CMS Final Settings Rule, APD staff will use a specific heightened scrutiny process to ensure that the setting does not have the effect of isolating residents receiving Medicaid HCBS from the broader community of individuals not receiving HCBS based on any of the following:

- A design or model of service provision interaction that limits the residents from interacting with the broader community;

- The setting restricts residents' choice to receive services or to engage in activities outside of the setting; or
- The setting is physically located separate and apart from the broader community and does not facilitate beneficiary opportunity to access the broader community and participate in community services, consistent with a beneficiary's person-centered service plan.

The heightened scrutiny process consists of an on-site assessment and resident interviews to ensure:

- The setting supports provider and activity choices for the residents, including which services residents receive and which entity provides those services.
- The residents are actively involved in their person-centered planning and are making life choices that align with their vision for the future.
- The residents are responsible for managing their own home needs, are free to come and go as they please, and are integrated in the neighboring community.

During the exit interview, the providers will be informed of any identified deficiencies or concerns regarding the setting. All deficiencies must be remediated within the timeframes established by the APD notification.

COMMUNICATION AND EDUCATION

The State has implemented an outreach strategy for sharing information about the HCB Settings Rule with recipients, providers, interested parties and stakeholders. It is the State's goal to promote transparency regarding implementation actions and procedures by disseminating direct, clear and timely communication of information relating to applicable programs, waiver services and the State's HCB Settings Rule implementation activities.

All updates relating to the HCB Settings Rule can be found on the State's web site at http://ahca.myflorida.com/Medicaid/hcbs_waivers/index.shtml. The website is a resource open to recipients, providers and other stakeholders and includes general information about the HCB Setting Rule, the State's HCB waiver programs, and any updates to the waivers. This web site will be updated when new information becomes available.

The Agency has also established an email inbox and encourages all interested parties to submit their comments regarding its HCB settings transition and waiver or State Plan amendment and waiver renewal activities (FLMedicaidWaivers@ahca.myflorida.com). Comments are logged and taken into consideration when finalizing the implementation processes and prior to submission to CMS.

Additionally, APD has methods of communicating with the recipients, providers and stakeholders they serve and will utilize those processes in conjunction with the State.

1. Recipient Outreach:

The State will employ a direct approach to communicating information with recipients through their support coordinator or case manager accordingly. The State believes this personal approach will help to engage recipients in the implementation process and facilitate a greater understanding of its actions.

2. Provider Outreach:

The primary method of communication to providers is through provider alerts. These alerts are distributed to all waiver and state plan providers and contain relevant information regarding updates to the HCB programs. A phone number and email address are provided in the alerts so that providers may contact the State if they have any questions or concerns.

In addition to receiving provider alerts, Plans that are part of the LTC program receive direct provider communications from the Agency contract manager.

The State developed a webinar training for all residential and non-residential HCB services providers to assist them with completing the self-assessment and to address any concerns or questions they had regarding the HCB Settings Rule implementation. Training sessions have been provided to stakeholders and interested parties upon request.

3. Stakeholder Outreach:

The State prioritizes effective communication to its many stakeholder groups. The primary method of communication is the State's provider alert system in which many stakeholders participate. Additionally, the State publicly notices its public comment periods and public meetings in the Florida Administrative Register.

To ensure proper and collaborative implementation of the HCB Settings Rule, the State has established an interagency workgroup that consists of staff members from each of its impacted sister agencies. These meetings occur monthly and have attendants from the State and APD. The workgroup includes subject matter experts and other stakeholders.

4. Education and Training

The State strives to ensure that all of its stakeholders are well informed about the HCB Settings Rule and its implementation activities. The State developed a comprehensive, progressive, training and education program and hosted a number of virtual trainings to introduce and reinforce the HCB Settings Rule and its requirements. These trainings were held during the summer of 2014 and consisted of a webinar presentation and a Q&A session. Additional trainings for the Plans were held the summer of 2019, which also consisted of a webinar presentation and a Q&A session. The State will provide more training opportunities throughout the HCB Settings Rule implementation period relative to remediation and heightened scrutiny.

PUBLIC NOTICE PROCESS

The State was required to have a 30-day public notice and comment period which was held on August 26, 2016 and ended on September 25, 2016 to allow for meaningful public comment prior to submission of this transition plan. The State provided two statements of public notice on the transition plan. The State summarized all comments received during that public comment period and described how the issues raised were addressed in the transition plan prior to submission to CMS.

Summary of Public Comments

The following summarizes the public comments received during the 30-day comment period that began on August 26, 2016 and ended on September 25, 2016.

- The State received comments of concern about the language relative to services in the rule.
- The State received comments about the use of service referral forms.
- The State received comments encouraging clarification of the HCBS rule be disseminated to sister agencies.

The State thoroughly reviewed and considered all comments and feedback received when developing the STP.

The State was required to have an additional 30-day public notice and comment period, which was held February 15, 2021 through March 16, 2021 to allow for meaningful public comment prior to resubmission of this transition plan. The State has summarized all comments received during the public comment period.

Summary of Public Comments

The following summarizes the public comments received during the 30-day comment period that began on February 15, 2021 and ended on March 16, 2021.

- The State received comments recommending that the State transition nursing facility residents to assisted living facilities to maximize cost effectiveness.

Based on feedback from CMS, the State is required to have an additional 30-day public notice and comment period, which is being held June 23, 2021 through July 22, 2021 to allow for meaningful public comment prior to resubmission of this transition plan. The State will summarize all comments received during the public comment period and describe how the issues raised were addressed in the transition plan prior to submission to CMS.

Summary of Public Comments

The following summarizes the public comments received during the 30-day comment period that began on June 23, 2021 and ended on July 22, 2021.

- The State did not receive any comments or recommendations in response to this public comment period.

Statements of Public Notice

- The State will publish a minimum of two statements of public notice for public input processes with a link to the transition plan on Florida's Administrative Register and the Agency website. The statements of public notice will provide information on the public comment period for the statewide transition plan, a link to the plan, and the locations and addresses where public comments may be submitted.
- A link to the public notice and information on the public comment period on the Florida's Administrative Register can be found at https://www.flrules.org/gateway/View_Notice.asp?id=24673713
- An electronic copy of the Florida Statewide Transition can be found on the Agency website at https://ahca.myflorida.com/medicaid/hcbs_waivers/docs/transition/Statewide_Transition_Plan_March_2022_Final.pdf
- Individuals can access a non-electronic hard copy of the statewide transition plan at their local area office. To obtain a list of the area offices, individuals may contact a Medicaid representative at 877-254-1055 or Telecommunications device for the deaf (TDD) at 866-466-4970. Information for local area offices can also be found on the Agency website at https://ahca.myflorida.com/MCHQ/Field_Ops/Field_Office_Info.shtml. In addition, the State will send notice to the LTC Plans and waiver support coordinators who will distribute the public notice to share the information with their members.
- The State will consider and modify the transition plan, as deemed appropriate, to account for public comments.

|| SECTION I – PRESUMPTIVELY INSTITUTIONAL

Settings will receive a copy of the assessor's completed report, including findings of deficiency or non-compliance.

Settings that are determined to be presumptively institutional, may elect to have individualized intensified review by the State or its designee by submitting evidence that demonstrates that individuals receiving home and community-based services in the setting are integrated into the greater community in accordance with the HCB Settings Rule. These settings can also elect to coordinate with the State or its designee to implement a plan of remediation to come into compliance.

Assessors may utilize facility observation, individual file review, setting policy review, or individual interview to ensure that settings are compliant with HCBS requirements.

**** Note: If the answer to any probing question in Section I is 'yes,' the setting is presumptively institutional. Please use the 'Comments' section to clarify answers where applicable.***

SECTION III – SIGNATURES

Each setting will receive a copy of the assessor’s completed report, including findings of deficiency or non-compliance within ten (10) days of its on-site assessment.

Settings that are determined to be presumptively institutional, or otherwise non-compliant, may elect to have individualized intensified review by the State or its designee by submitting an evidentiary packet or a plan of remediation. Templates for both are available on the State’s web site at http://ahca.myflorida.com/medicaid/Policy_and_Quality/Policy/federal_authorities/federal_waivers/rule.shtml. Settings have 10 days to respond to their Managed Care Organization with plan of remediation.

Settings that fail to come in compliance within the timeline outlined in their plan of remediation will be ineligible to participate in the provision of HCBS to Florida Medicaid recipients.

|| SECTION III – SIGNATURES

Each setting will receive a copy of the assessor’s completed report, including findings of deficiency or non-compliance within ten (10) days of its on-site assessment.

Settings that are determined to be presumptively institutional, or otherwise non-compliant, may elect to have individualized intensified review by the State or its designee by submitting an evidentiary packet or a plan of remediation. Templates for both are available on the State’s web site at http://ahca.myflorida.com/medicaid/Policy_and_Quality/Policy/federal_authorities/federal_waivers/rule.shtml. Settings have 10 days to respond to their Managed Care Organization with plan of remediation.

Settings that fail to come in compliance within the timeline outlined in their plan of remediation will be ineligible to participate in the provision of HCBS to Florida Medicaid recipients.

Yes <input type="checkbox"/> No <input type="checkbox"/></p>	<p>YES NO</p> <p><input type="checkbox"/> <input type="checkbox"/></p>	
<p>C. The setting has the effect of isolating individuals receiving Medicaid HCBS from the broader community.</p>	<p>The setting has the effect of isolating individuals receiving Medicaid HCBS from the broader community due to one of the following:</p> <p>1. The setting is designed to provide people with disabilities multiple types of services and activities on-site, including housing, day services, medical, behavioral and therapeutic services, and/or social and recreational activities, thereby limiting interaction with the broader community. Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>2. The setting uses/authorizes interventions/restrictions that are used in institutional settings or are deemed unacceptable in Medicaid institutional settings (e.g. seclusion) Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>3. The setting is a farmstead or a disability-specific farm community that</p>	<p>YES NO</p> <p><input type="checkbox"/> <input type="checkbox"/></p>	

is on a large parcel of land with little ability to access the broader community outside the farm. While sometimes people from the broader community may come on-site, people from the farm do not go out into the broader community as part of their daily life.

Yes No

4. The setting is in a gated/secured community for people with disabilities where multiple types of services are provided and the individuals receiving HCBS do not leave the grounds of the gated community to access activities or services in the broader community.

Yes No

5. There are multiple settings co-located and operationally related (i.e., operated and controlled by the same provider) that congregate a large number of people with disabilities together and provide for significant shared programming and staff, such that people's ability to interact with the broader community is limited. An example of this setting is several group homes and adult day care centers or adult day training settings on the same campus, street, or court.

Yes No

6. The setting is a place where individuals live and work or attend an educational program in the same building or in buildings in close proximity to each other (e.g. two

	<p>buildings side by side). Individuals do not travel into the broader community to live or to attend work/school and therefore their integration into the community is limited to large group activities.</p> <p>Yes <input type="checkbox"/> No <input type="checkbox"/></p>

* The State's validation sample was selected from the universe of settings assessed from 2015 to present by the health plans. By 2019 when the state assigned the remaining settings requiring assessment to the health plans, a number of settings had either contracted with different or multiple Long-Term Care Plans. The number of settings assessed by plan contains only the 2019 assessments, therefore, the number of settings validated, which contained assessments done previously with the 2015 tool, were more than the number of settings completed for some plans.
